Re: Undocumented

Premium based financing - wouldn't include the ~~situation~~ situation of Mexican workers in TX.
Payroll based financing - their wages would be pegged just like Americans
Fair labor stds, OSHA, FICA applies for illegal workers

Presume that all employees are lawfully employed.

* Illegals - should get \$ from employers as though employees are legal, but illegal workers shouldn't get coverage.

Employer mandate applies.

Indiv. mandate -

Option - let them in voluntarily & pay subsidy

* let them in voluntarily but don't pay subsidy.
don't let them in.

PLAG
[]

Indiv. Mandate Enforcement:

Require people be enrolled thru workplace.

Outreach thru HIPCs

Enrollment requirement for HIPC

Check off box on tax form that you're in plan

Point of service enrollment as some kind of penalty.

Back payments for not enrolling.

- @ birth

- POS enrollment for pregnancy care

Need very good rules on P.O.S. enrollment for indiv. Who sign up thru the ACA sickle + would skew risk adjustment.
Couldnt do random mandatory assignment (Medicaid history) You'd sign up person in plan in which that provider participates.

Family vs. indiv.

Does an HMO have to provide care for indiv. beyond emergency

Out of plan/out of state utilization - Gary Clifton. Who keeps per what rules?

HEADACHE Moving to other areas - nonprimary & primary.

Medicare as secondary payer - how has group thought of this

U.S. citizens working abroad:

8/2/93 Meeting -- Melanne

1. . 2/3 support for inclusion in plan if med. nec. or approp.
 2. . Repro. health / preg.-related care
 3. . Leave up to doctor & women
Prevention & responsibility
- } Complex issue
- decision between woman and doctor
 - prevention & responsibility

Don't sound like we are promoting abortion

Trusted sources:

- doctors & AMA

med nec. or approp → moves from 44 to 66%
↓

that means up to doctor & woman

Repro services / preg. related ⇒ they do specify ⇒
"including abortion"

Voters don't think abortion is covered in insurance policies.

57% against letting states decide

48% favor → do not override state laws

1. Message is extremely important
2. prevention & responsibility is important
3. med. nec. or approp. — sounds responsible & limiting

Distinction between coverage & funding

Calling it an employer based plan — negatives still

focused on taxpayer funding.
Didn't use Medicaid | welfare

Reducing need for abortion by covering contraception.
"Safe, legal & rare"

- Everyone has to pay something?
- Preventive care generally?

What about covering ~~pre~~ teen abortions under
parents plan?

- State law prevails
- don't be explicit about parental notification
and consent.
