REPORT ON THE DEATH OF VINCENT W. FOSTER, JR.,
BY THE OFFICE OF INDEPENDENT COUNSEL
IN RE: MADISON GUARANTY SAVINGS & LOAN ASSOCIATION

investigators. The experts included Dr. Brian D. Blackbourne, Dr. Henry C. Lee, and Dr. Alan L. Berman. The investigators included an FBI agent detailed from the FBI-MPD Cold Case Homicide Squad in Washington, D.C.; an investigator who also had extensive homicide experience as a detective with the Metropolitan Police Department in Washington, D.C., for over 20 years; and two other OIC investigators who had experience as FBI agents investigating the murders of federal officials and other homicides. The OIC legal staff in Washington, D.C., and Little Rock, Arkansas, participated in assessing the evidence, examining the analyses and conclusions of the OIC experts and investigators, and preparing this report.

The autopsy report and the reports of the pathologists retained by the OIC and Mr. Fiske's Office demonstrate that the cause of death was a gunshot wound through the back of Mr. Foster's mouth and out the back of his head. The autopsy photographs depict the wound in the back of the head, and the photographs show the trajectory rod through the wound. The evidence, including the photographic evidence, reveals no other trauma or wounds on Mr. Foster's body.

The available evidence points clearly to suicide as the manner of death. That conclusion is based on the evidence gathered and the analyses performed during previous investigations, and the additional evidence gathered and analyses performed during the OIC investigation, including the evaluations of Dr. Lee, Dr. Blackbourne, Dr. Berman, and the various OIC
