Sorry for the delay. Would tomorrow at either 11:00 AM or 1:00 PM work?

George,

Thanks. We will send a system diagram and setup some time to talk next Tuesday if that will work for everyone. We are in agreement with this approach but we want to make sure we are all on the same page with defining which ECWS components constitute [healthcare.gov](http://healthcare.gov) and which don't.

Jon

**Subject:** RE: [Healthcare.gov](http://healthcare.gov) ATO

Jon,

In consultation with the CISO, we think the best approach would be to do the following:

- Since Mitre still has funds, complete the SCA testing for just [Healthcare.gov](http://healthcare.gov) with the goal to secure an ATO – Mitre just needs a date to get started
- For the remainder of ECWS, develop a mitigation plan that outlines the steps and timelines for the other components of ECWS, including the migration to the VDC

These actions would cover ECWS from a security perspective and also will give you some flexibility in case the VDC move gets pushed back for whatever reason.

For the EZ App, I would recommend also engaging Monique and Kirk. If everyone agrees that this should be part of FFM, and then it should definitely be part of the FFM SCA in December. Probably having a quick meeting would be good, I know is difficult to go back and forth via email.

Thanks

***George Linares***

**Subject:** Re: [Healthcare.gov](http://healthcare.gov) ATO

George,

Thanks for flagging this. We are anxious to finish this up as well. I wanted to flag a couple of items and get your take on how this impacts scheduling the remaining activities.

Over the past 2 weeks, we have been working with the HP VDC team to discuss a migration of the ECWS systems from Terremark to the VDC. We are in the mix as one of the pilot systems to be migrated first. Given this, we are thinking it might make the most sense to get this migration complete and then re-audit in the new VDC environment. We are thinking this migration will occur around the end of the year.

Regarding the EZ app project that we are discussing on a separate thread, Mark Oh, Ketan and I have been discussing and we all agree that system more properly fits under the FFM family of systems. Our understanding is that there are upcoming audit activities for the FFM scheduled in mid-December and we'd recommend that the EZ app be looped into those activities.

Please let me know if we should grab some time to discuss these items further.

Jon

**Subject:** [Healthcare.gov](http://Healthcare.gov) ATO

Ketan and Jon,

The FO has been informed that currently [Healthcare.gov](http://Healthcare.gov) as part of Exchange Consumer Web Site (ECWS) FISMA system is operating without an ATO. EISG has asked MITRE to finalize the SCA report (of which no testing was done) due to not having an environment ready for testing (by end of August) and as well as being unable to get an alternate date for when the environment would be ready to complete the SCA activities. Operating without an ATO is a serious issue and it represents a high risk to the agency. OC needs to work with EISG to bring [Healthcare.gov](http://Healthcare.gov) under compliance. Please advise.

Thanks

**George Linares**
