[REDACTED] is going to send over a list of recommendations for us to apply for additional security against hackers.
He did say we should probably remove all Clinton files, folders, info off our servers etc. on an independent drive.

I've done quite a bit already in the last few months related to this. Her team had me do a bunch of exports and email filters and cleanup to provide a PST file of all of HRC's emails to/from any .gov addresses. I billed probably close to 10 hours in oncall tickets with CESC related to it :)

I'm curious the questioned emails actually reside on the new server we provisioned.

We may be asked to provide those. Can't imagine it will be much more than that.

Guess we'll have to wait and see if we are asked to do anything.

HRC-1532

We should probably discuss what if...regarding Hillary and the state department emails.

I know we did not take over email until AFTER the mentioned occurrence.

I assume some of those emails may have been migrated when we took over?
