To: Mills, Cheryl D; Sullivan, Jacob J; Abedin, Huma; Hanley, Monica R

Cc: Wells, Alice G; S_SpecialAssistants Subject: S mentioned BB not working

On the call with Blair, 5 mentioned her BB is down and she is not getting emails. Not sure if this is a battery issue or something wrong with the BB, but FYI.

Senior Reviewer

Thank you Thomas and we also appreciate all the assistance and team coordination on this matter as well. I will continue to work with your team so long as this and all other ScanMail issues persist. So, please do not hesitate to call or keep me in the loop if there are any issues or concerns relating to ScanMail or have any questions. I have a couple of meetings schedule with both VIRT/Trend Micro support on this matter and will continue to highlight the continuous problem areas as well as user frustrations going forward. Again, thanks for all the local assistance on this matter.

EB

This was my call. Because I don't have all the facts to what exactly is going on with SMEX, I decided to be methodical. This is due to the fact both content filtering and anti-virus checking on that BH has blocked malicious content in the recent past. If we find the changes made are not affective, our next steps will be:

- A. Disable Content Filtering and restart SMTP services
- B. Verify if problem continues....
- C. Disable.AV Filtering and restart SMTP services
- D. Verify if problem continues....
- E. Escalate

We will continue to communicate with you over the next couple of days as I have asked of you.

Again, thank you for your assistance. While we are frustrated with the situation, please don't misunderstand that is directed towards you. We are appreciative of all your efforts. tom

Subject: RE: Meeting with Huma

Jay,

It's correct that Anti-span need to be disabled per our recommendation but that was before we started receiving complaints for these isolated issue with categorizer problems and through workaround, we discover that adding these two filters on our 8Hs eliminate that problem. And we've already brought it to VIRT and Trend Micro attention. We continue to work with them daily on these issue and believe they're working through those issues in the version 10 (Pilot) which seem to experience similar issue as Trey already elaborated on (also these new settings are not in original documentation).

So, in order to eliminate the categorizer issue which seem to be our primary concern, then you will want to disable the two additional filters as recommended and we will let you know if anything changes in the near future or else you will not get the user/customer satisfactory result on that very issue if those filters are still enabled. Thanks.

Attach is a copy of the installation guide for ScanMail 8.

Subject: RE: Meeting with Huma

I am not confident that Trend will provide an update for SMEX 8. That is two revs behind their current offering, SMEX 10, and they are pushing us to go to that (currently in pilot), and they have never not yet been able to deliver a fool-proof solution for an issue that has been around for at least 2 years. Unfortunately, we have seen similar problems with SMEX 10. EB, correct me if I'm wrong though, I don't think that we have seen the problem with SMEX 10 when running without the anti-SPAM plece.

Tom, what type of update are you looking for by 1500? I do think that turning off anti-SPAM is a resolution if that is what was causing the problem. Did the SMTP service ever get restarted? I don't think I got an answer on that.

Thank you for all your efforts. We are grateful for your persistence on this matter and we are ready to assist in any manner.

To officially indicate the obvious from S/ES-IRM, we view this as a Band-Aid and fear it's not 100% fully effective. We are eager for Trend Micro to fully resolve, quickly. I want an update on the status by 1500 today, even if it's nothing changed.

Trey do you agree with my position? If not, please simply contact me direct. Thanks

tom

The ant-phishing filters settings should be left as it is now, it should be the 3 filters on the instruction I sent Jay and his team yesterday. Just so you know, we're still working with Trend Micro on some of these filter related issues and will update you if any changes are necessary. Thanks.

Turning off the anti-spam filter on the server is recommended at least to verify that it resolves the problem (assuming this is recurring). Instructions were sent to Jay. It is also recommended to restart the SMTP service when the Categorizer is not processing messages properly.

Jay,	*

I did use different scenario to track down some of the specific message in question, as presented routing between the sender and recipient (s), but I did not find or get any specific data to analyze the cause as well as determine if these messages actually came through our system or got stuck somewhere on it's transmission or if it did not hit any of DOS Bridgeheads at all. I did use multiple methods to track down messages through all and selected BHs to try and at least get something that seem to have been deliver into the databases where the recipient mailboxes are homed but none gave me anything concrete on the subject matter. However, I saw other messages that were sent from the same users that came through from same senders without problem.

This bring us to the point where we want to know "the differences" or what types of messages were delivered without problem and those that cannot be traced from the sender point of view and how these two different messages were sent in the first place (either BB, MAPI client, OWA or through other application or device). Also, let' remember certain attachment or message sizes over 30MB will be refuse delivery.

Lastly, I will like to at least get more information or screenshot of the messages that were stuck in the categorizer, I'm not sure why I did not find them or see those as well but if I could get more information on that I think that will help our process as well (It was resent at 7:11 am by sender to huma, received and also "submitted to Categorizer" on sessml32u).

D7

D6

At this point I'm not relating any of these to Scan	fail yet until I get answers to some the questions as well as the version
	and other SES Exchange BH servers. Thanks.

Jay E. Gazlay Worldwide Information Network Systems Office: 202.647.4525 Mobile: In accordance with E.O. 13526 this message is not-classified.	
From: LaVolpe, Kenneth E Sent: Friday, December 17, 2010 12:04 PM To: SES-IRM_Tech Subject: Re: Meeting with Huma	
Jay and Nancy could you look into this immediately. This should trump all other activities. You can also have a 1 day extension on heat tickets.	
From: Almodovar, Cindy T Sent: Friday, December 17, 2010 11:17 AM To: SES-IRM_Tech Cc: SES-IRM_FO-Mgt Subject: Meeting with Huma	
I met with Huma for about 30 minutes to go over mail issues. She gave me some examples listed below, but also, things are inconsistent. But issue #1 is of an e-mail which was sent to her twice this morning, did get received on but was not delivered. See details below.	
(Have accompact for the ection to remail site whis name is Bryan Ragliance and he actually now works for State)

Huma sent several tests from her clintonemail account to Lona and myself – they were received. But there are many messages and responses not received.

- 2. She sent a message this morning from her state.gov account to cheftwan@mail.house.gov.
 - Recipient responded, but she didn't get the response. I found that the response arrived and is on as "submitted to Categorizer" at 6:47 this morning.

D7

D7

- It was resent at 7:11 am by sender to huma, received and also "submitted to Categorizer" on
- 3: AOn)12/13; hor 22@clintonemail/com:sent almessage to huma@clintonemail/com: sullivanij@state.gov and!sternto@state:gov;ats7:09)am; The subject line was Kudos and Espinosa. Huma received the message at the Glinton address but the State recipients did not receive!
- On 12/14, hdr22@clintonemail.com sent a message to huma@clintonemail.com and Valmoroli@state.gov at 10:03 pm. The subject line was blank. Huma received at Clinton address, but Lona did not receive on her state.gov account.
