• ir	ncreasing outside lighting.	
and p	property manager for the owners also agreed to punch a hole in the wall between the two compounds for vehicl bedestrian access and relocate some old factory machines on the property to block the unused vehicle gates. Up this time, Post used available FAVs on the inside to block vehicle gates.	
	wing close coordination with post, OBO, and IP over the previous months, several DS offices (PSD, LGP, and lential Security) provided funding in the amount of approximately \$80K for facility and structure upgrades that ded:	
	Concrete, jersey-type barriers installed curbside and on the villa grounds to block unused vehicle gates.	
÷	Four steel, manual drop-arms (vehicle barriers) for access control and anti-ram protection.	
•	Compound lighting increased for LGP observation.	
	Barbed wire installed on top of the existing perimeter wall to raise height. Installation of barbed wire on top of the interior chain link fence to create a secondary barrier.	
•	Installation of several LGP platforms for property and street surveillance.	
•	Construction of four guard booths.	
•	Installation of steel grillwork on all windows not already treated with this protection.	
•		B
\$		
•	Erecting sandbag emplacements for internal defense purposes. Hardening villas with safe rooms with a steel door.
