Hello Kristina, We were not able to procure for you today. Your request will be on next week's schedule.

(b) (6)

From: Howard, Kristina
To: 'perrin' <perrin@garlic.com>
Date: 8/7/2018 6:41:51 AM
Subject: RE: Done with the last request

Hi Perrin,

We need to be on the schedule for the next few weeks. Here is the list:

Thurs or Fri Aug 9/10
Thurs or Fri Aug 16/17
Thurs or Fri Aug 23/24
Thurs or Fri Aug 30/31

Only one set of tissue is needed each week.

Thank you again for all the tissue received thus far!

Kristina

Hi Kristina,

We're done with the shipments you previously requested. Just let me know when you want to be back on the schedule.

Enjoy the rest of the summer!

Best,

Perrin

Subject: Re: Tissue request

Hi Kristina,

This shouldn't be a problem. I will have you on the schedule and will give (b) (6) (b) (6) e-mail address for notification. Should all of the tissue we're sending be sent to you and (b) (6) or just the one for this/next week?

I've put all of the requests below on our schedule, so we'll be set for July and August.

I'm sure (b) (6) won't have a problem billing to the existing PO since you've done it in the past.

Best,

Perrin

Thanks Kristina. It is frustrating when you KNOW you've told them about an issue. You've given them guidance. You've given them a way to look up proper packaging for every researcher...but then...something like this happens. Very frustrating.

I am so sorry. We have a couple of new techs and are using the FedEx system for airbills now. She probably clicked on the incorrect address. I will speak with her and make sure this doesn't happen again.

According to the FedEx station here...it will be ready for pickup by 0900.

Perrin

Perfect. I just need to know if it is different because I will have to

We didn't either...but...many of the doctors are Jewish!

FYI...Saturday delivery can't be First Overnight according to FedEx...they don't 'do' First Overnight on Saturday since their staffing levels are low. They will take a First Overnight package...and deliver it early on MONDAY!

It is being sent Priority Overnight to the station...so should be there earlier than if it was going to a delivery location.

Hi Kristina,

Yes, we have the EDS Drive hold address. The specimen is 15 weeks.

Due to the Rosh Hashanah holiday...the clinics were closed yesterday...so no real large tissue today.

Subject: RE: HFT Procurement for FDA

Hi Kristina,

Thanks for letting me know.

Have a great week!

Perrin

Hi Kristina,

I know we missed at least one week of tissue for you. Do you want to be on the schedule this week, or are you OK with tissue for now?

We're hoping so too, Kristina. It's so frustrating. We're also working with a new doctor in one of the busiest clinics...not a good combo! The tissue is awful!

Subject: RE: Tissue?

Hi Kristina,

Nothing today. We had an afternoon clinic in NJ and were hoping for the best, but nothing.

This week I'm working with a doctor who induces fetal demise at 20 weeks. The other doctors who staff this clinic don't induce fetal demise until 22 weeks...and of course...this week we had 4 21 week cases that all had been injected with digoxin on Wednesday so the tissue is unusable.

I'll have you on next week and will prioritize your request.

Subject: Re: Tissue?

Hi Kristina,

(b) (6) did send an e-mail around 1pm today but just to the FDA.HHS.GOV address.

Hello here is your blood test results.

(b) (6)

Client(s): ADVANCED BIOSCIENCE RES.

Name/ID: 9775

Reference IDs: LAB-1868384

SS#:

Gender: F

DOB: 00/00/00 Age:

Accession #: 1868384

Specimen #:

Date Collected: 07/14/16 13:30

Transfusion:

Comments:

Sample Type: LIVING

of Tests Ordered: 3

** FINAL REPORT **

REPORTED AND PRINTED TIMES BELOW REFLECT MOUNTAIN TIME

Date Received: 07/15/16 09:43 Reported: 07/15/16 22:58 Printed: 07/15/16 23:00

TEST NAME	RESULTS	UNITS	REFERENCE RANGE
HEPATITIS Bs Ag	NONREACTIVE		NONREACTIVE Biorad Genetic Systems HBsAg EIA 3.0 is FDA-approved for living and cadaveric donor screening.
HEPATITIS C Ab	NONREACTIVE		NONREACTIVE ORTHO HCV Version 3.0 ELISA is FDA-approved for living and cadaveric donor screening.
HIV 1&2 Ab	NONREACTIVE		NONREACTIVE BioRad GS HIV-1/HIV-2 Plus O EIA is FDA approved for living and cadaveric donor screening. This is a screening assay; it is neither a diagnostic assay nor a confirmatory test for the presence of HIV.

We always track packages in the morning to make sure they're all going where they need to be. (b) (6) called about yours today and was told there was already a (b) (6) on it. We knew you'd be looking!

For all their faults, FedEx is still the best around for the price, in my opinion.

Hi Kristina,

We're as frustrated as you are, and (b) (6) has gotten quite a few different reasons for no tracking of packages today!

We are sending a set of tissues to you for delivery tomorrow. (b) (6) will let you know the FedEx tracking number and we'll hope for the best. I believe they will be coming from New Jersey, so HOPEFULLY they won't go through Memphis or Indianapolis before coming to you.

Hi Kristina,

Last week was very strange. One clinic where traditionally they do 30-45 surgeries on their surgery day...had 13. Amazingly slow.

I'll prioritize your request for Thursday with Friday delivery since your mice are rapidly aging out!

Perrin

Thanks for letting me know Kristina...it was a mess.

I truly do not know what the tech was thinking when she just added your Saturday address to the usual airbill. She's never done this before. We all did our best and this topic is now going to be in all training sessions on what NOT to do.

I'm going to be in Portland the beginning of July to do some retraining..and to followup on this mess.

It won't happen again. I still can't believe it happened this time...what was she thinking???

Hi Kristina,

I just wanted you to know that there MAY be a problem with the delivery of the tissue we're sending tomorrow.

The, relatively new, procurement tech used one of your weekday delivery preprinted airbills and just added the Saturday delivery address. We are working with FedEx to get the routed to your Saturday HOLD location.

I'm in New Jersey, but just got off the phone with the tech who is getting this issue resolved. She says the package hasn't been put into the system yet, and I just confirmed that with the FedEx website tracking tool.

Right now I've got to get to bed, but Linda and the tech will continue to work with FedEx to get the address changed.

Please check with the FedEx website to monitor the tracking number. If you need to call in the morning, that will only help the shipment get to you.

So sorry this happened. The tech has spent the last 4 hours trying to rectify this error. I'm sure it won't happen again...at least from this tech.

Hi Kristina,

Since we missed getting tissue for you one week you'd requested, did you want to be on for this week or are you done?

Hi Kristina,

Thanks for letting me know. I'll let the techs know you can't take tissue on Saturday this week.

Hi Kristina,

I'll have you on the schedule for the dates noted. Just let me know on Friday the name you'll need on the package if we don't get tissue for weekday delivery.

Hi Kristina,

Thursday and Friday for delivery is absolutely your best bet.

Does the tissue HAVE to come from a male fetus? It really helps when we can send either, especially since this is an important and time sensitive surgery.

Perrin

> Perrin,

Hi Kristina,

Not a problem. Hopefully we'll get tissue this Thursday for Friday and you can get this done!

I hope you feel better soon. I hate being sick!!

Hi Kristina,

I'm sorry I didn't get back to you more quickly after your e-mail on Friday. I'll answer your questions first!

First overnight is not available for delivery on Saturday, however, you can choose to pick up the package from a FedEx location and those packages are usually ready by about 0900 or earlier. I think delivery is guaranteed by noon on Saturday.

We do not have many folks requesting thymus/liver on Saturday. We do have more requests for just liver, but thymus/liver requests are filled before requests for just liver. As for tissue on the Memorial Day weekend, I've already had some researchers cancel, so it looks good for tissue acquisition.

I will put you on the schedule beginning next Wednesday and Thursday for delivery on Thursday or Friday.

I'm in Dallas this week at a conference, but if you have other questions, please e-mail or call my cell (b) (6).

Perrin

Hi Kristina,

Due to the storm on the East Coast, and notification from FedEx that shipments might be delayed, ABR will not be shipping any tissue samples to the East Coast until FedEx lets us know that normal delivery has resumed.

Wednesday will be the earliest that we would put you on the schedule, which would result in Thursday delivery. If there are delays specific to you, please let me know.

Stay warm and safe this week!!

Hi Kristina,

You're in luck! I'll be staffing a clinic that week and will MAKE SURE you get tissue...well as much as I can do that...but I will prioritize your request.

Tissue availability varies from week to week as you know. We are working in a clinic in Philadelphia and one in New Jersey so we have more cases that when you were requesting tissue last.

Just let me know for sure when you want tissue and I'll make it my priority.

Hi Kristina,

If you've got a photo...that would be great. I will also contact the tech and make sure she knows.

It's in our protocol for deliveries to you and I think sometimes, although they're told they must look at the protocol before sending packages...that slips through the cracks. A photo will help me let her know it IS important to look at the documentation!

Perfect Kristina,

Thanks for adding Friday for all requests. We work with many more clinics on Thursday than any other day of the week. We only work with one clinic on Tuesday that does large cases and two on Wednesday.

Thanks again.

Hi Kristina,

You are not on the schedule for tomorrow. (b) (6) sometimes doesn't look at the master schedule for the week when she does notifications. I don't particularly like that she sometimes doesn't look...but it's often difficult to force compliance when other things are on her mind.

Hi Kristina,

We've tried UPS in the past and have not been pleased. FedEx may have someone in your area who is doing this...but, by far, they are the best of the 'main line' couriers.

As you'll see when the package arrives, I put MANY FO stickers and three Do Not Xray stickers. I'll also ask the FedEx drop off site I'm using here in New Jersey why it might have a delivery exception for your location...although last week's package came from Minneapolis.

Weird.

Hi Kristina,

I'm in Philadelphia and just checked as well...and you're correct it looks like it was either NOT sent First Overnight or the FedEx driver who picked the package up didn't correctly get it in the system as FO.

As soon as the office is open in California I'll check with them and I'll also check with the tech. I'll get back to you as soon as I know.

Hi Kristina,

Not a problem. I didn't put you on the schedule for tomorrow. Just let me know what weeks work for you.

Importance: High

Hi Kristina,

Since we missed getting tissue for you one week you'd requested, did you want to be on for this week or are you done?

Perrin,

I need to revise our tissue request for this week. We can only receive on Thursday or Friday. No one is available to process on Saturday this week.

Thank you,
Kristina

Hi Kristina,

Yes, we have the EDS Drive hold address. The specimen is 15 weeks.

Due to the Rosh Hashanah holiday...the clinics were closed yesterday...so no real large tissue today.

Just checking it to see if you were able to procure for us today.

Thank you,
Kristina

So sorry Kristina...late clinic and (b) (6) left for the day. Nothing tomorrow, so I have you on the schedule for procurement tomorrow with delivery Saturday.

With the short week, all of the clinics have been slow.

Date: 8/29/2017 9:04:52 AM
Subject: Tissue request

Hi Perrin,

We would like to request tissue for the following weeks:

Sept 7, 8 or 9
Sept 14, 15, or 16
Sept 21, 22 or 23
Sept 28, 29 or 30
Oct 5, 6, or 7
Oct 12, 13 or 14

If we end up receiving tissue on a Saturday, I may need to change to whom the package is addressed on certain weekends. I will not be able to pick it some Saturdays.

Thank you,
Kristina

Subject: Tissue for next week - update

Perrin,

They will be shutting down power to the animal facility on June 10, so we won't be able to do surgery that day. Please adjust our request for the upcoming week to just Thursday (6/8) or Friday (6/9) receipt.

Thank you,
Kristina

Perrin/ (b) (6)

In order to avoid hassles with our payments group for the rest of our contract, I need to place an 'official' order against the remaining money for this contract this week but cannot specify delivery dates. I will send you an email order for (4) sets of tissue; I will need to receive an email confirmation of the order and an invoice (dated between May 10-15) for the total of four sets of tissue to be delivered as soon as available. When you send the tissues, you won't send an 'invoice' for each tissue, it will be listed as a packing slip. If you have any questions, please let me know.

Also, please do not specify any delivery dates on the invoice.

Thank you,
Kristina

Subject: RE: HFT Procurement for FDA

No problem.

Btw, the package on Friday did not have 'Do Not Xray' stickers. It appears that whoever packaged it up forgot them. Our Fedex carrier recognized the box, so it was okay this time.

Subject: Tissue request

Hi Perrin,

We would like to get into the tissue request queue again. Below are the dates for our request, as always thymus + liver and sex doesn't matter for these.

Week of

Sept 12 – Th or Fri

Sept 19 – Th, Fri or Sat (if Saturday we may need a different recipient on the package)

Sept 26 – Th, Fri or Sat

Oct 3 – Th, Fri or Sat

Oct 10 – Th or Fri

Thank you,
Kristina

Hi (b) (6) & Perrin,

Given how old the mice are (12 weeks) we will use frozen tissue. Fresh tissue is always our preference, but I don't think we can wait another week. We are going to receive more mice in early Sept so we will try for more tissue then. I hope supply issues will resolve themselves by that time.

Thank you for trying!

Hi Kristina,

Nothing today. We had an afternoon clinic in NJ and were hoping for the best, but nothing.

This week I'm working with a doctor who induces fetal demise at 20 weeks. The other doctors who staff this clinic don't induce fetal demise until 22 weeks...and of course...this week we had 4 21 week cases that all had been injected with digoxin on Wednesday so the tissue is unusable.

I'll have you on next week and will prioritize your request.

I haven't received an email regarding tissue for Friday. Just checking if you were able to procure for us or not.

Please reply to all – I still don't have internet at home.

Thank you,
Kristina

Perrin,

We would like to receive tissue for each of the following weeks:

July 4 – Th, Fri or Sat
July 11 – Th, Fri or Sat
July 18 – Th, Fri or Sat
July 25 – Th, Fri or Sat

If we are unable to receive tissue in each of those weeks, then we will add the week of August 1 (Th, Fri or Sat) to the request.

As always, we would like to receive liver & thymus for each delivery and the test results for HIV, HepB & HepC once available.

Thank you!

Subject: RE: Tissue request for week of June 20

Hi Perrin,

Thank you for the reply. It is strongly preferred to have a male fetus if at all possible. However, after we dose the mice, we have to proceed with the surgery, so at that point undetermined sex or female is better than no tissue. I know in some cases it is impossible to tell what the sex is, however, I don't know what proportion of your tissues are in that category.

Okay, given all information, let's go with either Thursday (6/23) or Friday (6/24) delivery (either way first Fedex), male tissue if at all possible, next choice undetermined, last choice known female. As always liver and thymus tissue, but under our new contract we will have tissues tested for HIV, Hep B & Hep C with results sent when available. As you say, getting the tissue is most important so we don't lose the animals in this surgery.

I'll send a separate email for tissues that we need next month for routine humanization surgery.

Best Regards,
Kristina

Hi Kristina,

Thursday and Friday for delivery is absolutely your best bet.

Does the tissue HAVE to come from a male fetus? It really helps when we can send either, especially since this is an important and time sensitive surgery.

Subject: Tissue request for next week

Perrin,

We have a very important and timing-wise, challenging surgery the week of June 20th. We will be making dual humanized BLT mice (human liver and the BLT surgery) at the same time. This requires coordination of tissue from ABR and the hepatocytes. We prefer male tissue for this delivery and want to know for scheduling purposes what will be easiest for you work with as far as dates. Is it better to go with Wed or Thurs for delivery or Thurs or Fri for delivery? For this surgery we cannot receive tissue on Saturday. I can't go with Wed-Fri because of the treatment I have to give the mice to do the hepatic part of surgery.

I appreciate your input.

Thank you,
Kristina

Subject: Tissue this week

Perrin,

Thanks again for the assistance with tissue this month – especially through all of the Fedex nightmares! I know we originally requested tissue on either Th/F/Sat this week, but I would like to narrow it to either Friday or Sat. It turns out we have no one available to process tissue on Thursday. I hope that is okay.

Thanks,
Kristina

Perrin,

Just left you a message – since being picked up yesterday there is no tracking on the tissues – not even scanned at the sorting center and Fedex is unable to tell me anything. Is there any way we can get a shipment of tissue for tomorrow? I have three guests here to watch processing/surgery and no tissue and no idea if or when it will show up.

Any help you can provide is appreciated!!!

Thanks,
Kristina

Hi Kristina,

This shouldn't be a problem. I will put the March 10th/11th shipment as top priority.

Subject: Tissue request

Perrin,

We would like to order tissue (thymus & liver) for delivery on the following dates:

March 4 or 5 (Fri or Sat)

March 10 or 11 (Thurs or Fri) – it is critical that we receive tissue one of these dates; we are hosting a group who are flying in to observe us process tissue and perform surgery.

March 17, 18 or 19 (Th, Fri or Sat)

March 24, 25 or 26 (Th, Fri or Sat)

Please let me know if the request for March 10/11 causes any issues.

Thank you,
Kristina

Subject: Tissue delivery schedule update

Perrin,

For both this week and next week we would like to add Thursday to the potential delivery dates. So for the revised delivery dates would be:

10/22, 10/23 or 10/24

and

10/29, 10/30, 10/31

Thank you,
Kristina

Perrin,

We have new mice arriving so I would like to setup a tissue delivery schedule for Sept/Oct. The following dates for tissue receipt are requested:

- ☐ Fri Sept 11
- ☐ Fri Sept 18 or Sat Sept 19
- ☐ Fri Sept 25
- ☐ Fri Oct 2 or Sat Oct 3
- ☐ Fri Oct 23 or Sat Oct 24
- ☐ Fri Oct 30 or Sat Oct 31

As always, we are requesting liver and thymus for each date.

Regards,
Kristina

That is incredibly low volume vs. 'normal'. But I guess it is impossible to predict how many tissues you may actually receive in a given week given the nature of the business.

Hi Kristina,

Last week was very strange. One clinic where traditionally they do 30-45 surgeries on their surgery day...had 13. Amazingly slow.

I'll prioritize your request for Thursday with Friday delivery since your mice are rapidly aging out!.

Perrin

Subject: RE: HFT Procurement for FDA

Hi Perrin,

The delivery was a mess! Even though you (ABR) spoke with Fedex about the mixup and I called at least five times between last night and this morning, they did not hold it at the station, they ignored everything and put it on the truck for delivery. I spent over an hour and a half at the pickup station trying to pick it up which is when they told me they put in on the truck. I was able to get the truck rerouted and have another employee meet the truck in order to get the package.

We just got it about 20 minutes ago. I will have to cut surgery short because I am not allowed to have employees here past 6pm on a Saturday. Perhaps we can discuss how to avoid this in the future as I will not be allowed to have surgery on Saturdays if we get tissue this late again.

I appreciate you letting me know last night so I was able to alert some of my team members.

Thanks,
Kristina

Hi Kristina,

I just wanted you to know that there MAY be a problem with the delivery of the tissue we're sending tomorrow.

The, relatively new, procurement tech used one of your weekday delivery preprinted airbills and just added the Saturday delivery address. We are working with FedEx to get the routed to your Saturday HOLD location.

I'm in New Jersey, but just got off the phone with the tech who is getting this issue resolved. She says the package hasn't been put into the system yet, and I just confirmed that with the FedEx website tracking tool.

Right now I've got to get to bed, but Linda and the tech will continue to work with FedEx to get the address changed.

Please check with the FedEx website to monitor the tracking number. If you need to call in the morning, that will only help the shipment get to you.

So sorry this happened. The tech has spent the last 4 hours trying to rectify this error. I'm sure it won't happen again...at least from this tech.

Subject: FW: Saturday tissue

Hi Perrin,

As mentioned in my email below (sent last week), I would like to get back on the tissue delivery schedule asap. Do you have any idea how much demand there is for tissue the week before Memorial Day (where people like to take a long weekend)? I would like to get tissue next Thursday (or Friday) if possible. Tentatively I have listed our delivery date request (pending your reply on Sat tissue delivery):

Week of:	Delivery Dates:
May 18	Thurs or Friday
May 25	Friday or Sat
June 1	Friday or Sat
June 8	Friday
June 15	Friday or Sat
July 6	Friday or Sat
July 13	Friday
July 20	Friday or Sat

If you would like to discuss Saturday delivery, my office number is 301- (b) (6) or cell (b) (6)

Kind Regards,
Kristina

Perrin,

I wanted to get some details on the logistics for Saturday tissue delivery. Is it possible to get Fedex first to a residential address on a Saturday? Any idea how early tissue is delivered if not via Fedex first?

What is the likelihood that we would receive tissue if we request it for Saturday? I have approval to have staff work on Saturday for some, but not all surgeries. For planning purposes I am trying to decide how definite to make the Saturday schedule.

After I hear from you, I will be putting in an order for tissue that should run through July.

Thanks,
Kristina

Hi Perrin,

No problem. The DC area is really unaffected by the major storm, we only have a few inches of snow and everything should be clear this afternoon. Thursday or Friday delivery are okay with us.

Thanks,
Kristina

Hi Kristina,

Due to the storm on the East Coast, and notification from FedEx that shipments might be delayed, ABR will not be shipping any tissue samples to the East Coast until FedEx lets us know that normal delivery has resumed.

Wednesday will be the earliest that we would put you on the schedule, which would result in Thursday delivery. If there are delays specific to you, please let me know.

Stay warm and safe this week!!

Thanks for the reply Perrin!

We would like to order tissue as mentioned below for next week (Week of Jan 26th), delivery any day Wed-Fri. We would also like to order tissue for the week thereafter (Feb 2) for delivery either W, Th or F. For all our deliveries we would like to continue using the "first overnight" option from Fedex.

I will submit another tissue request next week for the remainder of the month of February.

Thanks so much for your assistance. We appreciate you trying to accommodate our urgent tissue request for next week.

Hi Kristina,

You're in luck! I'll be staffing a clinic that week and will MAKE SURE you get tissue...well as much as I can do that...but I will prioritize your request.

Tissue availability varies from week to week as you know. We are working in a clinic in Philadelphia and one in New Jersey so we have more cases that when you were requesting tissue last.

Just let me know for sure when you want tissue and I'll make it my priority.

Subject: New tissue order

Hi Perrin,

I hope you had a nice holiday and wish you a Happy New Year!

We are beginning to gear up to make more mice and I wanted to inquire on how tissue availability has been? We have a batch of mice for a special project that we would like to get tissue for the week of Jan. 26th, either on Wed, Thursday or Friday. How likely do think it is we would be able to get it that week or worst case scenario, one week later (week of Feb 2)?

Thereafter we will have more flexibility in our tissue needs, and will place a tissue order for regular deliveries starting in February.

Thanks,
Kristina

Hi Kristina,

If you've got a photo...that would be great. I will also contact the tech and make sure she knows.

It's in our protocol for deliveries to you and I think sometimes, although they're told they must look at the protocol before sending packages...that slips through the cracks. A photo will help me let her know it IS important to look at the documentation!

Subject: FYI - Do Not Xray sticker missing

Hi Perrin,

Just wanted to let you know that last week's delivery (received May 30) did not have any "Do Not Xray" stickers on the box. If it wasn't for the Fedex person knowing that we normally receive these boxes, it would have been x-rayed. Do you need a picture to document this? I would like to make sure that the person who prepped last week's box knows that these stickers are essential for deliveries to us.

Subject: RE: September Tissue request(s)?

Hi Perrin,

I thought I already sent it to you - apologies for that.

For this week (9/2), if available, either Thursday or Friday delivery
Next week (9/9), either Wed, Thursday or Friday

No other requests this month.

Thank you!
Kristina

Subject: Cancel tissue request for this week

Hi Perrin,

I would like to cancel our request for this week. A team member will unexpectedly be out this week so we will not be able to process tissue.

We would still like to receive tissue next week (Aug 26) as previously requested.

Regards,
Kristina

Subject: RE: Delivery exception today

Perrin,

Just wanted to let you know that Fedex did not attempt delivery for first overnight last week. The exception the driver put in the system was bogus and they did not come to our campus. I spoke with Fedex about it and they will credit the cost of shipment to your account. For today's delivery someone once again put a delivery exception on the package saying there was a problem with the address (which is nonsense!), so it will again not be delivered first overnight. I spoke with Fedex about this and expressed my unhappiness with the service they are providing. They will also credit the cost of this week's delivery to your account.

If we continue to have problems with Fedex we may have to try UPS to see if they have any better reliability.

Thanks,
Kristina

Subject: Tissues okay but no sticker

Hi Perrin,

First, thank you for the tissue! They were not x-rayed because I was waiting for them at the loading dock and the driver remembered the fiasco last week. However, there were no "Do Not X-ray" stickers on the box or even in writing. If I had not been there, the box would have gone through the x-ray machine, so we were very lucky.

I noticed that they came from Portland, so perhaps the person shipping then was unaware of the need for the stickers. Just wanted to let you know.

Subject: RE: Package was x-rayed

Hi Perrin,

Yes, we were absolutely heartbroken. They were beautiful tissues and to lose them like that was awful. I already spoke with FedEx and indicated that damage occurred was due to their employee and they said all you need to do is file a claim with them for the price of the items shipped, and of course reimbursement of the shipping costs. Since it is not my FedEx account, they would not accept the claim from me. I did provide all the information needed to document what happened. And we have the FedEx person on video recording showing them putting it on the belt. So it was a problem of not reading the large labels on the box. I will be speaking to the manager of the facility to try to make sure it doesn't happen again. Please have accounting let me know if they have a problem filing the claim with FedEx as I recognize that ABR did nothing wrong - this one is all on FedEx.

Thank you,
Kristina

Hi Kristina,

DAMN...they were wonderful tissues. I procured them!

I'm training a new tech in Minneapolis and I told her how important it is to put the DO NOT X-RAY stickers on the package. Of course if you have an IMBECILE on the FedEx side....but then, now it's a moot point.

Please send me any photos you can showing the package going through the x-ray etc. I'll see what we can do on our end, although since ABR did everything we should have done and it was a FedEx problem on your end, we usually have to charge the researcher for the tissue. I'll have the accounting department get in touch with you if we're not able to get reimbursement from FedEx.

Subject: Package was xrayed

Hi Perrin,

Our package was x-rayed and the tissues could not be used. I filed a complaint with Fedex, and they should reimburse you the cost of tissues and shipping since they were damaged as a result of their actions. The fedex delivery person was the one who put it on the belt to be x-rayed. If you need documentation of this, I may be able to get a picture of the video showing the fedex delivery person putting it through the x-ray machine. There were two "do not x-ray" stickers on the box, but she apparently did not notice them until she delivered the box and I pointed them out to her. Do you need a photo of the box?

Given this loss, and that we have several batches of mice that must be made asap, I would like to amend our current tissue request to:

Week of May 13 – delivery either Wed, Thurs, or Friday

Week of May 20 – delivery either Wed, Thurs, or Friday

Week of May 27 – delivery either Wed, Thurs or Friday

Thank you,
Kristina

Subject: RE: Questions

Hi Perrin,

We would like to pay the extra \$30 to get the tissues on the first Fedex delivery. It would be worth the extra few hours of time we would save and the hassle of dealing with our current Fedex person. HHS /FDA uses UPS for all of our shipping and I think you said they were less reliable for getting tissues delivered in good condition and promptly.

Thank you,
Kristina

Hi Kristina,

Yes...generic reply and you're not on the schedule for today.

Regarding FedEx...you should have the package by 1030. We can have the package shipped 'first overnight' and it should get to you between 0700 and 0800. For regular overnight delivery we're charging \$110.00 for First Overnight the charge goes to \$140.00. If you have a FedEx number we can use to send packages...the fee might be less.

Hi Perrin,

I received an email from (b) (6) last night that you weren't able to procure for us and that we were on the schedule for today. I am assuming that is the generic reply since we didn't request tissue for Friday.

Also, we are having some difficulty with our Fedex delivery person, so I wanted to ask about the shipping. What time is the package supposed to be delivered to us by? I am not certain which overnight shipping box is normally selected and the 'guaranteed' timing of delivery. Also, if we were to try to move up the delivery time, do you have any idea how much more shipping would cost? I plan to follow up with Fedex directly, but want to make sure I have my facts straight prior to speaking with them.

Subject: Tissue orders

Hi Perrin,

We are *finally* back in business following a de-population! I would like to order tissue as follows:

Week beginning	Tissue Requested	Delivery Dates
April 8	Liver only (up to two)	Thurs and/or Fri
April 15	Liver, thymus	Wed or Thurs
April 22	Liver, thymus	Wed or Thurs or Fri
April 29	Liver, thymus	Thurs only
May 6	Liver, thymus	Wed or Thurs
May 13	Liver, thymus	Wed or Thurs

For delivery next week, if available, it would be great to receive two liver samples on one day, or get two deliveries in a row. I am not sure if you still have limited availability for tissue, but as always we are willing to work with you to receive what is available.

If you need any additional information for our requests, please let me know.

Regards,
Kristina

Subject: RE: HFT Procurement for FDA

Hi Perrin,

Sadly I will not be able to make it out for dinner. I tried to manage my schedule so I could drive out to Tyson's Corner late this afternoon, but couldn't make it work. I guess it will have to wait until the next mouse meeting, or if you have another trip to the DC area.

Hope you are enjoying the conference!

Hi Perrin,

That sounds good. I would like to provide as many options as possible to help you balance all the requests you receive. I realize that procurement often relates to factors that are out of your control though (i.e. how many procedures and if consent is obtained). We appreciate your efforts to get us tissue when requested. The current batch of mice we are trying to finish will be the last group for a bit, since we are still waiting for monies to become available to purchase more mice.

Thanks,
Kristina

Importance: High

Hi Kristina,

We can certainly try to get two smaller sets for delivery on the same day rather than one large set. If you'll allow me to put you on for either one large set or two small sets each time you're on the schedule that will give us more tissue to work with, and more 'chances' we'll be able to get tissue for you.

Unfortunately I can't promise that you'll get tissue either way! Clinics are the slowest I've EVER seen them.

We WILL do our best to get tissue to you each time you're on the schedule!

Subject: Tissue for tomorrow/next week

Hi Perrin,

We are having some logistics issues for Friday (unexpected absence of one of our team members), and wanted to request that if you haven't already identified/collected tissue for us, we would like to cancel. If you have, then please go ahead and send it, we will perform surgery on Saturday.

I was wondering if we don't receive tissue this week, would it be easier to get two sets of younger tissue (15-16 wks) on the same day vs. trying to get older tissue?

If you would like to discuss our request, please let me know. My office number is (b) (6)

Thank you,
Kristina

Hi Perrin,

I am enclosing my signed application for tissues. I have received a copy of the contract that was completed and you should be prepaid for \$12K of tissue purchases. For the accounting portion I will need to receive an invoice for each shipment so that I can account for the use of tissue with our accounting department. If additional information is needed to complete this process, please let me know. Once the application is approved, I would like to setup a schedule to start receiving the tissue.

Kind Regards,
Kristina

ADVANCED BIOSCIENCE RESOURCES, INC.

APPLICATION FOR THE ACQUISITION OF HUMAN FETAL TISSUE FOR RESEARCH

All requests for human fetal tissue are reviewed for feasibility of procurement and preparation. When approved, an individual protocol will be developed for the procurement, preparation and delivery of tissue samples, based on the information provided in this application and any subsequent communication.

I. APPLICANT INFORMATION

NAME: Dr. Kristina Howard
TITLE: _____
COMPANY: FDA
ADDRESS: (b) (6)
ADDRESS: (b) (6)
CITY,ST,ZIP: (b) (6)
PHONE #: (b) (6)
ALT. #: (b) (6)
FAX #: (b) (6)
EMAIL: Kristina.Howard@fda.hhs.gov

DELIVERY OPTIONS:

- ☐ Same Day: Commercial carrier, hand delivered
Maximizes cell viability (*geographical limits*)
☒ Next Day: Pickup, delivery Mon-Sat daytime
Economical for fresh, frozen specimens

Applicant will be charged for delivery fees.

Applicant may designate preferred carrier:

Carrier Name: Federal Express

Account #: _____

BILLING INFORMATION **Please send invoice to:**

BILL TO: Prepaid (contract #HHSF223201211452P)

(b) (6)

Please indicate how you heard about ABR: Use of ABR tissues in my previous position

II. HUMAN FETAL TISSUE

Tissue specimens requested: Fetal liver and thymus

Preferred gestational age (6-24 weeks): 16 - 24 weeks

Quantity requested (number of specimens/week): One set of tissue (thymus/liver) approx. twice monthly

Proposed starting date: October 2012

CONTAGIOUS DISEASE SCREENING: Availability of test results varies from 24 hours to 7 days after procurement.
Applicant requires the following tests to be performed by ABR:

☒ No testing required

☐ HIV
☐ HBSAG
☐ CMV

☐ HSV
☐ RPR
☐ HCV

OTHER _____

III. PRESERVATION

ABR uses *BioWhittaker RPMI-1640 With L-Glutamine* for tissue preparation, preservation and shipment. Applicant may supply ABR with other media specific to research needs. Please indicate preference below.

PRESERVATION METHODS AVAILABLE:

☒ Fresh; shipped on wet ice ☐ Media provided by applicant
☐ Passive freezing on dry ice; shipped on dry ice ☒ Media provided by ABR (RPMI)
☐ "Snap" freezing in LN2; shipped on dry ice

IV. DONOR INFORMATION

CONSENT VERIFICATION: Consent for tissue donation is obtained prior to specimen procurement. The consent is extremely confidential in nature and shall not be communicated to the researcher.

SPECIFIC DONOR INFORMATION: Charts are routinely examined for patient medical histories. Please identify any specific information sought and indicate contraindications to specimen procurement:

☐ Do not want to receive tissues from known HIV or Hepatitis positive mothers. Also prefer not to receive tissues that have a known chromosomal abnormality (e.g. Trisomy 21). _____

V. RESEARCH DATA

TITLE OF RESEARCH PROJECT: Testing Biologic Drug Products for Product Quality and Safety

ABR will provide tissue to researchers who provide information on current research funding, and a short summary of their research intent. **(Please attach a brief synopsis of the research project named above.)** Researchers must agree to use the tissue solely for research purposes and to acknowledge ABR in any publications resulting from the use of ABR provided tissue. Updates on research progress will be requested at six-month intervals. Researchers agree to publish the results of the research as promptly after the completion of the research as is reasonably possible without jeopardizing the sponsor's right to secure patents or copyrights necessary to protect its ownership or control of the results of the research. Researchers agree to inform ABR of the name of the publication and the date of the issue in which the results will be published. It is the intent of this requirement to make the results available to the general public through acceptable means of publication.

VI. SOURCE OF FUNDING

Please identify the primary source of funding for this project.

NIH ☐ Other Federal or State Grants ☒ Foundation Grants ☐ Other (specify) _____

If this application is approved by ABR, ABR shall provide services to the applicant in accordance with the terms and the other conditions on the reverse side, and the signature of the applicant shall constitute acceptance of all such terms and conditions by applicant. The entire agreement between ABR and applicant relating to the services provided by ABR is expressly set forth herein, and any modification or addition thereto shall be of no force or effect unless it is in writing and signed on behalf of ABR by a duly authorized representative.

BY SIGNING BELOW, THE APPLICANT ACKNOWLEDGES HAVING READ THE TERMS AND CONDITIONS ON THE FOLLOWING PAGE AND AGREES TO SUCH TERMS AND CONDITIONS.

TERMS AND CONDITIONS OF SERVICES

1. Services.

1.1 During the term of this agreement, and pursuant to the terms and conditions hereinafter set forth, ABR will use its best efforts to provide services in connection with supplying researcher with the types of human tissues set forth in this application, as approved by ABR, suitable for researcher requirements and in the amounts requested based upon ongoing discussions between researcher and ABR pursuant to the information sent by ABR.

1.2 Researcher acknowledges and agrees that ABR will provide the following types of services:

1. Removing tissue.
2. Preserving and processing tissue to a form suitable to the researcher needs.
3. Seeking consent for tissue donations from appropriate individuals, obtaining validly executed consent forms, and maintaining records of such consents in accordance.
4. Obtaining, labeling, storing, and delivering samples of donor or other required serum, and maintaining a system for matching such samples to specific tissue donations.
5. Preserving tissue viability and cleanliness during removal, processing, preservation, storage and transportation.
6. Storing tissue and transporting it to researcher in accordance with section 5.

1.3 In the event that tissues of the type specified in the application become unavailable to ABR, such that ABR is unable to perform the contemplated services, ABR shall have no obligation to perform such services.

2. Representations and Warranties. ABR hereby represents and warrants to researcher that (i) ABR will make no payments to anyone for any tissue transferred in connection with this agreement, and (ii) ABR will verify for each tissue delivery that appropriate consent was obtained for use of such tissue and any associated serum samples, and that adequate records of such consent are maintained; provided, however, that the parties hereto acknowledge and agree that such consents are extremely confidential in nature and shall not, in any case, be communicated to researcher. Researcher hereby represents and warrants to ABR that (i) researcher will neither sell nor transfer for valuable consideration any tissue received through ABR to anyone, (ii) researcher will use the tissue only to satisfy its objectives, which are, as acknowledged and agreed hereto, [research and clinical use], (iii) researcher agrees to inform ABR of any changes in clinical or research use of specimens received from ABR, or in any specifications, constraints, etc. in a timely manner, and (iv) researcher understands the bio-hazardous nature of human tissue and agrees to take proper precautionary measures at all times when handling tissue specimen.

3. Terms. The terms of this agreement shall be for one (1) year, beginning from the date hereof, and terminating one (1) year thereafter, unless either of the parties hereto shall have given to the other thirty (30) days written notice of its intention to terminate this agreement, whereupon same shall terminate thirty (30) days after date of said notice.

In default of notice as aforesaid from either party hereto, this agreement shall continue for further successive terms of one (1) year thereafter and in default of thirty (30) days written notice before the end of an annual term by either of the parties of its intention not to renew, whereupon this agreement shall terminate at the end of said term.

4. Payments. Researcher agrees to pay to ABR a fee for costs incurred by ABR in providing services in connection with the acquisition of each sample of tissue requested by researcher, to be mutually agreed upon by ABR and researcher upon approval of this agreement by ABR.

5. Shipment services.

5.1 All shipments will be made as soon as possible after request has been received by ABR from researcher.

5.2 Researcher acknowledges that networks of tissue availability are neither permanent nor dependable, but rather they fluctuate. However, ABR shall use its best efforts to transfer the tissue in the amounts requested by researcher.

5.3 Shipment will be made in the best possible manner so as to preserve the quality of the tissues. It is understood that the fragility of human tissue is such that damage may occur during shipment. ABR will use its best efforts to comply with the handling and shipment protocols provided by researcher.

5.4 ABR will package the tissue appropriately and, if so requested by researcher, will insure the shipment. Researcher agrees to bear all costs associated with insurance and shipment of any tissue.

5.5 The risk of loss and damage of any tissue or organs shall pass immediately to researcher when the shipment of such tissue or organs is deposited with a carrier for transportation at the F.O.B. point.

6. Limitation of liability. ABR SHALL NOT BE RESPONSIBLE OR LIABLE UNDER ANY SECTION OF THIS AGREEMENT OR UNDER ANY CONTRACT, NEGLIGENCE, STRICT LIABILITY OR OTHER LEGAL OR EQUITABLE THEORY, FOR THE COST OF PROCUREMENT OF SUBSTITUTIVE SERVICES, OR ANY INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO LOSS OF REVENUES AND LOSS OF PROFITS. ANY LIABILITY OF ABR UNDER ANY THEORY WHATSOEVER WILL BE LIMITED EXCLUSIVELY TO THE PROVISION OF EQUIVALENT SERVICES BY ABR OR, IF UNENFORCEABLE, TO PAYMENT OF AN AMOUNT NOT GREATER THAN ANY AMOUNT ACTUALLY RECEIVED BY ABR FROM RESEARCHER ON ACCOUNT OF THIS AGREEMENT.

7. No warranties. It is understood that human tissue is by nature neither permanent nor dependable. EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, ABR MAKES NO REPRESENTATION OF ANY KIND, EXPRESSED OR IMPLIED, INCLUDING ANY REPRESENTATION WITH RESPECT TO THE SAFETY, EFFICACY OR MERCHANTABILITY OR THE FITNESS FOR ANY PURPOSE WITH RESPECT TO THE TISSUE TRANSFERRED TO RESEARCHER IN CONNECTION WITH THIS AGREEMENT.

8. Indemnification. Researcher shall indemnify, defend and hold ABR harmless from and against all claims, causes of actions, suits, damages and costs arising out of, resulting from, or otherwise in respect of, the use of tissue transferred in connection with this agreement, except where such claims are the result of negligence of ABR, its employees, staff or agents to (i) comply with any governmental requirements, or (ii) adhere to the terms of this agreement.

9. General. This agreement shall be governed by and interpreted under the laws of the State of California, excluding rules of conflicts of law. This agreement may not be assigned by either party without the prior written consent of the other.

We will be using fetal liver and thymus to isolate CD34+ hematopoietic stem cells (HSC) and to implant fetal liver and thymus tissues into severely immune compromised mice (NSG, NRG, etc.). Additionally, the mice are transplanted with HSC isolated from the same donor tissue, resulting in a bone marrow/liver/thymus (BLT) humanized mouse. This procedure permits the full reconstitution of a human immune system in a mouse and will permit us to test biologic drug products in these mice.

Biologics provide unique and effective treatments for numerous human diseases and medical conditions. The efficacy of these therapeutics can be compromised by the patients' immune response to the drug resulting in antibody-mediated alteration of the biologics' activity or bioavailability. It is well established that high molecular weight structures, such as protein aggregates in biologic drug products, can enhance immunogenicity. They can be a result of the pharmaceutical manufacturing process, shipping or temperature stress. Other factors critical in determining the propensity to generate immune responses include the route of administration, dose, and frequency and duration of administration. Because each biologic is unique, it is not possible to predict, *a priori*, the *in vivo* consequences of different sizes, types or quantities of aggregates. Further, since the immune system of different species can distinguish orthologous proteins as foreign, the immunogenicity of biologics in humans cannot be assessed by testing these drug products in non-human species. The recent advent of "humanized" mice that recapitulate the human hematopoietic system permits direct *in vivo* testing of the human immunogenicity of biologics. Such studies are critical for developing scientifically sound approaches for evaluating and mitigating risk to product quality caused by aggregates and/or other components of biologics.

Hi Kristina,

I've attached the 2012 Fee for Service schedule and a 'fillable' 2012 application as well. I'm also sending our consent form in case you don't have that either!

Fill out and send back the application with a short synopsis of the work you'll be doing with the tissue and we'll get it approved and you'll be ready to go.

Hi Kristina,

Congratulations! Yes, the forms are the same. Do you need me to send you a 'clean' set or do you still have them in digital form. I think the only thing that is new is the 2012 Fee for Service schedule...but you may have that as well.

Let me know if you need me to send the application or anything else and I'll get it out to you.

Subject: New agreement for receiving tissue

Hi Perrin,

I am still at FDA and working on humanized mice, however, I have a new position as an independent investigator (gov't term for PI) in another division. As a result, I will need to enter into my own agreement with ABR to receive tissues as I will no longer be working with (b) (6) (other than via collaboration). Do I need to complete the paperwork submitted previously by (b) (6) but with specifics for my research program? Are the forms the same? If you could let me know what, if any, other information would be needed, it would be very helpful.

Subject: No tissue this week

Hi Perrin,

I received an email from (b) (6) yesterday indicating we were on the schedule this week, but we do not need tissue. I apologize if I did not keep our delivery status updated properly with you. Following last week's tissue delivery we completed surgery on all the mice that were waiting for implants for a few weeks. I am currently out of town for the week and will let you know next week what our tissue request schedule will be.

Again, sorry for the confusion.

Thank you,
Kristina

Hi Perrin,

Just wanted to follow up with you regarding the tissue deliveries. We have three batches of mice that still need to be humanized, so please keep us on the schedule every week until we manage to receive three sets of tissue. As of right now we still prefer Wednesday or Thursday delivery, but I will see if it might not be possible to add a Friday for some of the upcoming weeks. I will have to check with the staff to see what their schedules look like before I can confirm any additional delivery dates.

Subject: Confirming no tissue this week

Hi Perrin,

Just wanted to confirm that we are not on the schedule for tissue this week. I am relatively certain that we did not request tissue, but wanted to make certain. We should be on the schedule for the weeks of 4/9, 4/16, 4/23 and 4/30 for either Wednesday or Thursday delivery.

Hope you have a nice Easter!

Thanks,
Kristina

From: Howard, Kristina
To: 'perrin@garlic.com' <perrin@garlic.com>
Date: 3/2/2012 3:05:47 PM
Subject: Updated Tissue Delivery Schedule

Hi Perrin,

I wanted to update our tissue delivery schedule for next week and provide a schedule for March and April.

Next week we can only receive tissue on Thursday March 8.

For the weeks thereafter:

Week of March 12 - Wed or Thurs delivery
Week of March 19 - Wed or Thurs delivery
Week of March 26 - Wed or Thurs delivery
Week of April 2 - no tissue
Week of April 9 - Wed or Thurs delivery
Week of April 16 - Wed or Thurs delivery
Week of April 23 - Wed or Thurs delivery

If we are able to begin accepting tissue for Friday delivery I will let you know. For the delivery requests in March and April, it would be preferred if the tissues were 17 weeks or greater.

Thanks again for all your efforts! Last two boxes have arrived without issue (or being x-rayed).

Kind Regards,
Kristina

Hi Perrin,

I realize with the constraint on delivery dates and tissue size that some of these deliveries may not be possible, but I know you always do your best.

Subject: Tissue request

Hi Perrin,

After going through a large number of hoops, we finally have some drug to use for ablation and are allowed to use it. Unfortunately it is on a backorder, and we rec'd a limited supply, so we will have to do much larger surgery groups than we normally would. Given the constraints we have, I would like to order thymus and liver, at least 18 weeks gestation (due to the size of the group we need to humanize) for the following delivery dates:

Week of February 13 - delivery Wed or Thurs
Week of February 20 - delivery Wed only (I realize this may not be possible)
Week of February 27 - delivery Wed or Thurs

Depending what we receive during this period, and additional drug availability, we will schedule additional deliveries at the beginning of March.

Thanks again for all your understanding and assistance through this period.

Subject: RE: FW: Fedex mishap

I thought the giant red sticker was funny as well. But they were quite emphatic about the size when I questioned them. As I mentioned, we are more than happy to pay for the 3" x 5" stickers if the ones you have in stock are smaller. I just want to do everything possible to prevent another mishap.

Not a problem Kristina...although I wonder about the GIANT RED STICKER!
We will comply with their request but it seems a bit silly to me...we'll cover the box with stickers!!

This will be a good training experience for us. Thanks for the help.

Hi Perrin,

My apologies for not sending pictures yet, I will get them to you by Monday. I found it somewhat funny that the employees at the loading dock (and the fedex employee) both said that unless it was a giant red sticker, they would never see it because of the number of packages arriving. Their definition of giant was half the side of the box, and on all sides. I must admit that until faced with this situation, I would not have believed it possible. Hopefully this serves as a good 'real life' training experience.

I will be sending you a separate email shortly with our tissue request for the next few weeks.

Thanks,
Kristina

Hi Perrin,

Please feel free to bill our account for the labels. We are happy to pay for them if it means fewer mix-ups with Fedex. I am hoping since it was the Fedex employee that ignored the "Do not x-ray" labels that they would take responsibility for the loss and reimburse you for the cost of the tissue, in addition to the cost of shipping. We really appreciate the credit for the tissue.

We saved the box from the trash and will take pictures for you tomorrow.

Thanks again for being so understanding!

Kristina

Hi Kristina,

We'll get some of these and I'll send them out to the techs.

I'm not sure about making a claim...I'll check with our FedEx person and see.

Can you send a photo of the 'do not xray' that was on the box? That will help me in training!! If not, no problem...but I'd like to have a photo if you can supply one.

I'll instruct the office to 'no charge' you for the tissue.

Hi Perrin,

We had a big problem today with our shipment. The Fedex person did not read the "Do Not X-Ray" on the box (they said they couldn't see it - writing too small) so it got x-rayed. As one would expect all the mononuclear cells were dead. Given that Fedex did not follow shipping instructions, is it possible for you to file a claim with them to reimburse for the cost of shipping and tissue since we could not use the liver after irradiation? I really hate the idea of paying for tissue that we could not use because Fedex screwed up.

If you want to give me a call to discuss the details of what happened, my office number is (b) (6). I did speak with the personnel at the loading dock and the Fedex driver, and have come up with procedures to prevent this from happening in the future. We would like to provide you with the stickers linked below to place on all five sides of the box and in addition, we will wait at the loading dock on the morning of arrival to ensure it doesn't accidentally go through the x-ray.

I am so sorry to ask for additional labeling of our packages, but I am not certain what else can be done to prevent a future occurrence.

On a positive note, we may be able to start making mice again next week. I am waiting to see if the drug will arrive in time and will update our tissue delivery schedule with you tomorrow.

Thanks,
Kristina

Subject: RE: HFT Procurement for FDA

Hi Perrin,

Please put me on the collection schedule for today.

Based on the fact I didn't receive any emails about tissue collection last night, I am assuming that I was not on the schedule for Wednesday collection and I really do need tissue this week if at all possible.

Thank you,
Kristina

Hi Kristina,

I did not put you on the schedule for tomorrow since you'd not requested tissue for delivery on the 1st. I can add you...but if it won't work for you that's OK.

Hi Perrin,

I am rereading this email and it appears we are on the schedule for Thursday collection rather than Thursday delivery. I had some things scheduled for Friday April 1 which is why I requested tissue receipt for either Wednesday or Thursday. I will see if I can reschedule them to accept tissue on Friday since it appears I will not be receiving any tomorrow.

Thanks,
Kristina

Hi Perrin,

Thanks for letting me know. Just wanted to make certain that I did not receive tissue tomorrow (Thursday) as I will be at an all-day seminar.

Thanks,
Kristina

Hi Kristina,

I don't have you on the schedule for today. We do have the schedule you sent and (b) (6) sometimes 'cuts and pastes' replies if no tissue is procured.

Subject: Fetal Tissues

Hi (b) (6)

I received your email address from the Garcia lab at UNC where they trained me to make humanized mice. I am at the FDA and need to obtain fetal liver and thymic tissues and am wondering what your process for ordering/procurement is. If you are not the correct person to contact for new orders, I would appreciate if you could forward my request to the correct individual.

Sincerely,
Dr. Kristina Howard

Date: 4/5/2018 5:48:31 AM
Subject: RE: Tissue Thursday?

Perrin,

No problem. I generally figure if we haven't been notified we are receiving by 5:00pm PDT that we aren't getting tissue. And of course there is always less tissue available for Thursday delivery vs. Friday or Saturday.

Just a note, while we (like everyone else) are desperate for tissue each week, this week and especially next week are important for us to get tissue. We are trying to get several new staff qualified for our surgery (so they can participate in the other scheduled surgeries) and we must have fresh tissue to do that. I realize tissue is always hit or miss, but if it is possible to prioritize us these two weeks, it would be greatly appreciated.

Thank you,
Kristina

I totally understand. It actually ended up being a good thing that she misaddressed it - there were no 'Do Not X-ray' labels on it, so if it had been delivered to the building it would have been x-rayed and killed the tissue. As someone currently training lots of new people, I totally understand the issue.

Thank you,
Kristina

I really appreciate what you are saying. I have found that sometimes it just takes making mistakes to teach the lessons. In this case it was all okay - just an inconvenience as opposed to a problem. Tissue looked good - we are busy processing and have started surgery.

Thank you again for procuring it for us!

Kristina

Thanks Kristina. It is frustrating when you KNOW you've told them about an issue. You've given them guidance. You've given them a way to look up proper packaging for every researcher...but then...something like this happens. Very frustrating.

Subject: Tissue request for next week

Hi Perrin,

I left you a message today regarding tissue. We have had a major hiccup arise with the working hours some of our animal facility staff are allowed to work, so for the short term, we cannot receive tissue on Saturday. It is expected to be corrected but may take a few months. L

We still need one more set of tissue for the last group of mice we have to make next week. I know you don't have control over how much tissue is available, but if there is any way possible that we can get tissue next Thursday or Friday, it is immensely appreciated.

If you need to discuss or have any questions, please give me a call at

(b) (6)

Thank you,
Kristina

From: Howard, Kristina
To: Perrin Larton <perrin@garlic.com>
Date: 6/18/2018 8:06:05 AM
Subject: Tissue request

Hi Perrin,

I would like to request a set of tissue for either this Thurs or Fri (6/21 or 6/22) OR next Thurs or Fri (6/28 or 6/29). Can the tissue shipment have both Dr. (b) (6) and me listed? I will be out of the office on some of those days and want to make sure it gets to our lab. The notification email can still be sent to me, but it would be helpful if she could be cc'd (b) (6) @fda.hhs.gov).

Also, we need to order (4) sets of tissue for July, however, to ensure they are covered on the existing PO, can they be all billed for July 6 – as we did last year when time was running out? I can provide a copy of that invoice if needed. Alternatively, we could bill for two sets with the June delivery and (3) sets for July 6.

For July/Aug, we will need tissue on the following weeks to get the (4) sets referred to above:

July 12/13 (Thurs or Fri)
July 19/20 (Thurs or Fri)
July 26/27 (Thurs or Fri)
Aug 2/3 (Thurs or Fri)

We will also need tissue most weeks in August, but we are waiting on the new contract to be issued. We requested a start date of July 15 but I am not sure when this will get completed.

Saturday's are still not doable due to a contracting issue. We are still working to resolve the problem but I don't think it will be fixed before fall.

Thank you,
Kristina

Subject: Re: Tissue request

Hi Kristina,

This shouldn't be a problem. I will have you on the schedule and will give (b) (6) Yan's e-mail address for notification. Should all of the tissue we're sending be sent to you and (b) (6) or just the one for this/next week?

I've put all of the requests below on our schedule, so we'll be set for July and August.

I'm sure (b) (6) won't have a problem billing to the existing PO since you've done it in the past.

Best,

Perrin

> Also, we need to order (4) sets of tissue for July, however, to ensure
> they are covered on the existing PO, can they be all billed for July 6
> - as we did last year when time was running out? I can provide a copy

> of that invoice if needed. Alternatively, we could bill for two sets
> with the June delivery and (3) sets for July 6.
>
> For July/Aug, we will need tissue on the following weeks to get the
> (4) sets referred to above:
>
> July 12/13 (Thurs or Fri)
>
> July 19/20 (Thurs or Fri)
>
> July 26/27 (Thurs or Fri)
>
> Aug 2/3 (Thurs or Fri)
>
> We will also need tissue most weeks in August, but we are waiting on
> the new contract to be issued. We requested a start date of July 15
> but I am not sure when this will get completed.
>
> Saturday's are still not doable due to a contracting issue. We are
> still working to resolve the problem but I don't think it will be
> fixed before fall.
>
> Thank you,
