Gentlemen,

By now all of you should be aware of the great news from DARPA. We have a 5 year long collaboration ahead of us, so I think it would make sense for the Neustar team to visit Atlanta and my lab.

How is the week of August 15 looks like for you? Mine is completely open. Perhaps, we should schedule the visit then?

Many thanks,

Manos

Hey Mohan,

Many thanks for the intro. Peter, the pleasure was all mine!

Yes, you should come and visit us. I would suggest sometime in September, when the semester starts and my students are back from their internships in the bay area. You are more than welcome to visit sooner, but it will be just me and my three postdocs.

The Neustar team is always welcome to visit my lab. Anytime you, Rodney, Brian or anyone else want to visit.

Cheers,

Manos

Hi Manos,

It was great to meet you today – it is very interesting work that you do and I see great opportunities to collaborate with you.

I would like to try to figure out a time to come and spend more time with so that you can continue my education :-)

I am guessing you are based in Atlanta ?

Hello Manos

Just wanted to introduce you to Peter (our SVP Engg and Operations).

Peter. We contact Manos on his gmail account for consulting purposes and his Georgia Tech email address for interactions that relate with the university (example: sponsorship etc)

Regards
Mohan
