Dear Jim,

Nice to have heard you again. During the last year, we all experienced the hardest time, fighting against the virus, fighting against the rumors. The lab. operated smoothly he efficiently, providing a crucial platform for pathogen identification, animal modeling, antiviral drug screening and vaccine development, and we are very proud of the role and achievements of the laboratory. Here, I would like to express my sincere thanks to you and your colleagues for your assistance for the safety and secure operation of the lab.

I really hope you could come back here after the epidemic and we could share our understanding on lab management and infectious disease control.

Best regards and looking forward to seeing you in near future.

Zhiming
