Susan, do you have a few minutes to discuss the missing Trump boxes? Let me know if you want to use Google Meet or you can call my cell, at (b) (6). Thanks
- S** Susan Donius Dec 13, 2021, 12:07 PM
In a meeting now. Can I call you around 1pm? Are these missing boxes that NARA had in its custody?
- G** Gary Stern Dec 13, 2021, 12:09 PM
No, these are the boxes and records that Trump took with him to Florida. (b) (5), and we need to figure out the best way to pick them up. 1:00 doesn't work for me (I'm out from 12:30-2:30, and then have a 3:00). How about at 4?
- S** Susan Donius Dec 13, 2021, 12:10 PM
I have a 4pm but could do 6pm or later.
- G** Gary Stern Dec 13, 2021, 12:11 PM
I'll send you an invite for 6. Thanks

APPROVED 2/7 STATEMENT and 2/8 STATEMENT:

(b) (7)(E)

2/8 statement:

Throughout the course of the last year, NARA obtained the cooperation of Trump representatives to locate Presidential records that had not been transferred to the National Archives at the end of the Trump administration. When a representative informed NARA in December 2021 that they had located some records, NARA arranged for them to be securely transported to Washington. NARA officials did not visit or "raid" the Mar-a-Lago property.

Press Statement (**2/7/2022**) Regarding Boxes of Trump PRA Records Transferred to NARA

In mid-January 2022, NARA arranged for the transport from the Trump Mar-a-Lago property in Florida to the National Archives of 15 boxes that contained Presidential records, following discussions with President Trump's representatives in 2021. Former President Trump's representatives have informed NARA that they are continuing to search for additional Presidential records that belong to the National Archives.

As required by the Presidential Records Act (PRA), these records should have been transferred to NARA from the White House at the end of the Trump Administration in January 2021.

“The Presidential Records Act mandates that all Presidential records must be properly preserved by each Administration so that a complete set of Presidential records is transferred to the National Archives at the end of the Administration,” said Archivist of the United States David S. Ferriero. “NARA pursues the return of records whenever we learn that records have been improperly removed or have not been appropriately transferred to official accounts.”

Ferriero further stressed the importance of adherence to the PRA by all Presidents.

“The Presidential Records Act is critical to our democracy, in which the government is held accountable by the people,” Ferriero said. “Whether through the creation of adequate and proper documentation, sound records management practices, the preservation of records, or the timely transfer of them to the National Archives at the end of an Administration, there should be no question as to need for both diligence and vigilance. Records matter.”

Washing Post	jacqueline.alem@washpost.com josh.dawsey@washpost.com tom.hamburger@washpost.com	Were any documents marked as sensitive or classified found in any of the boxes recovered from former president Trump's house in Florida? Has NARA gone through all of the boxes? Has there been a referral to the Office of Inspector General or to the Department of Justice?	

FEBRUARY 8 FOLLOW-UP QUESTIONS AFTER 2/7 STATEMENT RELEASE (also highlighted in table below)

How big are these boxes? Are they all the same size? What are the dimensions? How many records are contained in each on average?

Was there any classified information included in the records taken from the WH by the outgoing president? Were any of the damaged documents classified?

Have the letters from Kim Jong Un been turned over to the Archives? Had they first been taken to Florida? How about the letter from Barack Obama?

Is there any evidence that the Trump White House was improperly using burn bags to destroy presidential records that should have been preserved? Was there a process put in place during the Trump presidency to check material placed in burn bags before such material was destroyed?

Are there any records you believe that should have been preserved that you have been unable to locate?

Have the video and photographic records from January 6 been turned over to the Archives and, if so, will those be turned over to the committee? Do such records include the “outtakes” of the message President Trump released that evening?

1) Do records created or received by the Executive Office of the President qualify as being “filed or deposited ...in any public office, or with any judicial or public officer of the United States’ as provided under U.S. federal law?”

2) Would the President of the United States at any point when receiving or drafting documents that would qualify as presidential records be considered as being “in custody” of said records?

The records obtained from Mar a Lago would presumably have been delivered to the National Archives facility in College Park not the Archives building in D.C., correct?

Sorry for the overload of emails but wanted to shoot a few questions your way in light of Chairwoman Maloney's comments last night calling for an investigation.

Were there any sensitive or classified documents found in any of the boxes recovered from former president Trump's house in Florida?

Has NARA gone through all of the boxes?

Has there been a referral to the Office of Inspector General or to the Department of Justice?

(From People Magazine) Can you also confirm that a search for documents and other items that should have been turned over to NARA is ongoing?

And is anyone from NARA able to comment on reports that among the items retrieved are letters from former President Obama and North Korean leader Kim Jong Un as well as a marked-up map related to tracking Hurricane Dorian and news clippings?

would you be able to confirm that the National Archives has hired more staff to help deliver records to the Jan 6 committee - <https://twitter.com/ryanobles/status/1488674578691993606>

It is reported that the National Archives and Records Administration retrieved documents — materials that were supposed to have been turned over to the records-keeping agency that former President Trump had “improperly removed.” Also, it is reported that Trump conceded the improperly removed items included correspondence with North Korea’s Kim Jong Un. Question is did you retrieve correspondence with North Korea’s Kim Jong Un?

NEW QUESTIONS:

CNN: Pamela Brown Wright, 2/10 3:52 PM

- 1.) Did NARA reach out to a Trump lawyer in May of 2021?
- 2.) Is it true there was virtually no movement on this between May and October when general counsel Gary Stern reached out and said NARA would send a letter to DOJ and Congress were

not returned in the immediate future? What happened in the interim between May and October? I'm told there were 'various reasons' things stalled. (between us, my understanding is Gary is not one to let things slide as he takes his role very seriously!)

- 3.) Is it true that Stern wrote multiple letters demanding the documents until they were finally turned over in January?
- 4.) Is the NARA aware there are classified documents in these boxes or is this just a concern?
- 5.) It is our understanding DOJ told NARA that the NARA IG should first investigate the issue. Is the IG still reviewing it or has the IG gone back to DOJ?
- 6.) is there any evidence that any of the documents either in pieces or together showed any evidence of any water damage as though they had been submerged? (Maggie Haberman is reporting today some of Trump's documents were flushed down the toilet)

USA Today, David Jackson (Feb 10, 2:49 PM)

- Did the Archives ask DOJ for "guidance"
- Did the DOJ respond by saying the IG at NARA should do it first?
- Can you confirm that the IG is looking at the Trump documents, especially amid concerns that they include classified documents?

		<p>Below is some information you may find helpful, and you can view the latest on this webpage.</p> <p>On October 13, 2021, the Archivist of the United States informed former President Trump that NARA would deliver an initial set of approximately 40 pages of records subject to the former President's assertion of privilege to the House Select Committee to Investigate the January 6th Attack on the U.S. Capital on November 12, 2021, "absent any intervening court order."</p> <p>On November 11, 2021, the U.S. Court of Appeals for the D.C. 		<p>Hope you're well. I'm a reporter for The Guardian covering the Jan. 6 select committee -- I was just wondering off the record if you are the point person (or your office is) handling the committee's request for documents from the Trump White House? Was just curious for my own understanding.</p> <p>Thanks,</p> <p>Hugo</p>
CBS News	Nikole Killion	<p>Does the National Archives have a statement on the White House's announcement today that it is waiving executive privilege on the documents requested by the House Select Committee to Investigate the January 6th Attack on the U.S. Capitol? Also do you have any background on how the archives has been complying with the request to date.</p>
Washington Post	Jackie Alemany	<p>We are unable to respond to that request at this time.</p> <p>Hi Gary -- Hope you're doing well. Sorry to bother on a Friday afternoon but wanted to reach out to see if NARA might have any comment on the two contradictory requests made by President Biden and former President Trump about executive privilege as it relates to Jan. 6 document requests from the 1/6 select committee. Feel free to call or message at any time. Thanks in advance for your time and help! Jackie</p>
CNN	Zachary Coehn	<p>Good afternoon,</p> <p>I wanted to check in and see if NARA has been contacted by former President Trump or the White House since being notified about the Select Committee's document request. <p>POLITICO</p>	<p>Quint Forgey <qforgey@politico.com></p>	<p>NARA RESPONSE on 3/29/21: does the National Archives have any plans to archive or otherwise preserve any tweets from Trump’s suspended personal account? If so, what is the timeline for those plans? Yes, this process is underway. Please check https://www.trumplibrary.gov/research/archived-social-media for more information and updates. Social media records are one of dozens of types of Trump Presidential electronic records the National Archives is preserving. The work on these records has to be prioritized with other records, including email, documents, and other data. We are working diligently to preserve more than 500 terabytes of the former president’s records and cannot provide an estimated date of completion for the 20 terabytes of social media records.</p> <p>NARA RESPONSE on 3/29/21: Good afternoon Quint,</p> <p>1) Apart from Trump, are any other former administration officials’ personal Twitter accounts being preserved? If so, which former administration officials? Yes. There were other individual accounts designated by the administration as records. The processing of many accounts is still underway and will be posted to The Donald J. Trump Presidential Library website under the Archived Social Media page as they are completed.</p> <p>2) How will the National Archives determine which of Trump’s tweets to preserve? For example, will all tweets he posted while in office be preserved? Will only those tweets deemed to be related to government business be preserved? The National Archives is not making a determination on a tweet-by-tweet basis and will make available all posts provided by the administration.</p> <p>3) Trump has been permanently suspended from Twitter, so what will be the format of his preserved tweets? Essentially, how will they be presented, and how will they be able to be accessed by the public? You can find out more about which types of accounts both individual and institutional are archived at the link (https://www.trumplibrary.gov/research/archived-social-media) provided earlier. Many accounts are already linked from that page, which will answer your questions about format and how they are archived and made available to the public.</p> <p>4) When you refer to 20 terabytes of social media records, are you referring to Trump’s posts across all social media</p>
-----------------	--	---

		<p>platforms, or only Twitter? And are you referring to posts from both personal and official accounts? Could you elaborate on that a bit for me, please?</p> <p>The 20 terabytes of social media records encompasses both the individual and institutional accounts across all social media platforms.</p> <p>NARA RESPONSE on 4/1/21:Here are the responses to your questions. We hope this is helpful.</p> <p>When NARA refers to Trump’s “individual” account (as opposed to his institutional account, archived at @POTUS45), it’s referring to Trump’s personal account (@realDonaldTrump), correct?</p> <p>Generally, yes, but if there is a specific place or quote you are asking about, please let us know and we can confirm that is what we meant.</p> <p>NARA told me in an earlier email that Trump’s personal Twitter account and “other individual accounts [were] designated by the administration as records.” Just to clarify, the Trump administration designated Donald Trump’s personal Twitter account as Presidential records, correct?</p> <p>Correct, for the time he served as President.</p> <p>I see that numerous archived Twitter accounts of individual Trump administration officials are already accessible online from the Trump Presidential Library website. Is Donald Trump’s personal account (@realDonaldTrump) the only remaining individual/personal account designated by the administration as records that has yet to be preserved by NARA?</p> <p>The accounts that are accessible online from trumplibrary.gov are those which remain live on their native platforms. Since @realDonaldTrump is no longer available on Twitter, we are still working to make the exported content available on trumplibrary.gov as a download. There are other individual/personal accounts that NARA is working to make available.</p> <p>NARA told me in an earlier email that — regarding Trump’s personal Twitter account — it would “make available all posts provided by the administration.” I’m trying to get a better sense of which of Trump’s tweets will be preserved by NARA. Which posts from the @realDonaldTrump account did the administration provide?</p>
--	--	--

		<p>NARA is still receiving electronic records created by the Trump Administration, so we cannot answer this question at this time.</p> <p>I asked earlier about the format and accessibility of Trump’s personal tweets after they are preserved. NARA directed me to the format of other preserved personal accounts from former administration officials. But Trump and his tweets have been permanently suspended from Twitter, so I’m still unclear on how his @realDonaldTrump tweets — once preserved — will be formatted and displayed by NARA. Will it be in the form of an archived Trump Administration account maintained by NARA on Twitter, the same as the accounts of other individual officials?</p> <p>NARA is still exploring the best way to make this content available.</p> <p>Is NARA treating Trump’s tweets from his @realDonaldTrump account as “Presidential records” or “personal records,” as defined by the Presidential Records Act, 44 U.S.C. §2201-2209?</p> <p>Presidential records.</p>
<p>Nextgov</p>	<p>Brandi Vincent, bvincent@govexec.com</p>	<p>NARA RESPONSE on 1/21/21:</p> <p>1. NARA is charged with preserving and providing public access to all official Trump Administration social media content, including deleted posts. Can you tell me more about the archiving tool that the White House was using to capture posts, in accordance with the Presidential Records Act, and in consultation with National Archives officials? What did the tool capture and how does it work? Was it used for previous (Obama) administration's social media accounts?</p> <ul style="list-style-type: none"> • The tool is ArchiveSocial. It was used by the Obama administration as well. The tool captures a variety of information depending on the platform. We will be preparing exports from the tool for public access.

		<p>2. NARA notes the records will be turned over to the National Archives beginning on January 20, 2021. That's Wednesday. Have the appropriate officials started that process to turn over those social media records?</p> <ul style="list-style-type: none">• Yes, this process is underway. Please check https://www.trumplibrary.gov/research/archived-social-media for more information and updates. <p>3. How long will that archiving process take and what all will it entail?</p> <ul style="list-style-type: none">• NARA has begun the task of working with ArchiveSocial to export the records from their platform and ingest them into NARA's Electronic Records Archive for preservation. We will also prepare exports from ArchiveSocial for public access, and they will be posted on trumplibrary.gov as they are made available. <p>4. What sort of content will the trumplibrary.gov website include? Who manages it and what all is going into launching it?</p> <ul style="list-style-type: none">• The Donald J. Trump Presidential Library website, which is managed by the National Archives and Records Administration, launched yesterday. The National Archives issued a press release with further information. <p>5. Twitter barred the president from posting. How is NARA approaching archiving the broader ban?</p> <ul style="list-style-type: none">• NARA plans to make exports from the accounts available for public access. The accounts will not be available on the native platforms for users to browse. We believe providing access to this information from an authoritative source is crucial to our mission - to preserve and provide public access to the records of our Federal Government and to document the modern presidency.

		<p>6. President Trump also used Facebook, Snap and Youtube, among other social media platforms. Is the overall archiving process different for those as opposed to Twitter?</p> <ul style="list-style-type: none"> • The White House used ArchiveSocial to capture Presidential records from Facebook, YouTube, Flickr, Instagram, and Twitter.

	<p>1. I am not comfortable attributing this to a "statement released by the National Archives Public and Media Communications." I am comfortable attributing this to "a statement National Archives Public and Media Communications shared with <i>Nextgov</i> this week." Is that ok on your end?</p> <p>That is fine.</p> <p>2. I read that, for President Obama's transition ArchiveSocial "processed more than 10 million social media records and transferred more than 450 exports comprising over four terabytes of data — all in less than eight weeks." How do those numbers compare to how much social media content needs to be processed for President Trump's transition? Are there more records from Trump?</p> <p>The Trump Administration generated more than 20 terabytes of social media data. We are still processing the information so we cannot provide more specific details at this time.</p> <p>3. Please provide any details you can share on the timeline here. You've started to work with ArchiveSocial for exports, but how long do you expect this entire process to take?</p> <p>Social media records are one of dozens of types of Trump Presidential electronic records NARA is preserving. The work on these records has to be prioritized with other records, including email, documents, and other data. We are working diligently to preserve more than 500 terabytes of Trump records and cannot provide an estimated date of completion for 20 terabytes of social media records.</p> <p>4. Under what sort of agreement or contract does NARA work with ArchiveSocial?</p> <p>The White House contracted with ArchiveSocial for the management of presidential social media records as well as the transfer of the records to NARA.</p> <p>5. <p>Washington Post</p>	<p>Philip Kennicott</p>	<p>NARA RESPONSE on 1/26/21: DRAFT IN GOOGLE DOCS</p> <p>Q1: For an article about a possible presidential library for former president Donald Trump, I would like clarify some of the legal and procedural steps that would have to happen.</p> <p>For information about the Trump Presidential Library, please see the answer to question #3 below. Please see https://www.archives.gov/presidential-libraries/presidential-transitions-faq for information on presidential transitions.</p> <p>Q2: For example, what is the standard procedure for preserving records when a president leaves office?</p> <p>Under the Presidential Records Act, the National Archives receives all records of the Trump Administration, which will be preserved in NARA facilities in the Washington, DC, area, and access to those records will be provided through the Donald J. Trump Presidential Library, controlled and administered by the National Archives.</p> <p>Q3: Have any formal steps been taken to initiate a library for the 45^h president?</p> <p>The Trump Library will be part of the National Archives' Presidential Libraries system, which, under the Presidential Libraries Act, established a system of privately constructed and Federally maintained Presidential Libraries, going back to President Hoover's administration.</p>

		<p>Regardless of whether a former President decides to build and donate an archival research facility and museum to NARA under the Presidential Libraries Act, the National Archives maintains the collection of Presidential records created by the Presidential administration as a Presidential Library.</p> <p>Information on the Donald J. Trump Library can be found here: https://www.trumplibrary.gov/</p> <p>Q4: And where the physical archives of the Obama administration be located? I meant to ask where researchers, who want access to Obama material, will go to do that research. I realize the physical archives are rather small in the case of Obama records./ I did indeed mean to ask about the Obama material, so as to better explain to readers some of the differences between how his records will be handled as opposed to those of previous presidents, in particular, the difference between a presidential center and an official presidential library. Also, I want to be clear about how access to purely digital records is handled. This is all to provide context.</p> <p>With funding by the Obama Foundation, NARA intends to digitize the textual Obama Presidential records. As these records are reviewed for release, they will be made available on-line through NARA's Archival Research Catalog. If there is a compelling need to see an original document, NARA will make it available in one of its public research rooms.</p>

<p>Government Executive</p>	<p>Courtney Bublé, cbuble@govexec.com</p>	<p>NARA RESPONSE on 1/29/21: Q1: Now that the Biden administration has been in office over a week, what have you observed about the quality and quantity of the records from the Trump administration?</p> <p>We have received approximately 4,700 cubic feet of textual records (roughly 11.8 million pages) and expect to take in as much as 500 terabytes of electronic records.</p> <p>The National Archives does not typically make statements about the quality of records, but rather preserves them for discovery and use. As with any body of records received by the National Archives, it takes a significant period of time for NARA to establish intellectual control and an understanding of the records.</p> <p>Q2: What, if any, issues occurred with the Trump administration's records preservation during the transition?</p>

		<p>As NARA anticipated, the process of completing the transfer of Trump Presidential records into NARA's physical custody is still ongoing. Necessary funding from OMB was delayed for many weeks after the election, which caused delays in arranging for the transfer of the Trump presidential records into NARA's custody. Even though the transfer of these records is ongoing, NARA assumed legal custody of them on January 20, 2021, in accordance with the Presidential Records Act.</p> <p>Q3: Are there any consequences under the law for Trump officials who destroyed and/or did not preserve documents? Does it differ if they are still in office vs. not?</p> <p>The Presidential Records Act provides that "The intentional violation of [section 2209(a) of the PRA] . . . shall be a basis for disciplinary action." Disciplinary actions cannot be taken against employees who have left the government.</p> <p>18 USC 2071 provides criminal penalties for the destruction of records.</p>

		<p>Approximately 250 TB of Obama Presidential electronic records and 15,000 cubic feet of textual records.</p> <p>FOLLOW UP: The Federal Records Act applies to executive and legislative branch agencies and the judiciary. The retention period for records covered by the FRA are determined by NARA and the creating agency as part of the scheduling process. Generally, these retention periods are not tied to presidential administrations but are instead correlated to the business needs of the agency. For example, an agency’s FOIA records are retained for six years following the close of a FOIA request. This is tied to the business needs of the agency and the ability of a FOIA requester to bring a lawsuit challenging the agency’s response. We do not have volume estimates by administration, as a result.</p> <p>See our FAQ about Records Scheduling and Appraisal for more information.</p> <p>Records covered by the PRA come into NARA’s legal custody, by operation of law, on January 20, at the end of the administration.</p> <p>With the exception of a small category of administrative records, such as who holds parking passes for White House facilities, all records covered by the PRA are preserved by NARA. Conversely, only one to three percent of records created by federal agencies under the FRA are preserved by NARA.</p>

Q2: Has NARA encountered instances where records that needed to be preserved under federal law were destroyed? Q3: Does NARA have any concerns about the Trump administration and document preservation?</p> <p>NARA RESPONSE on 2/9/21: You are welcome to attribute this response to: "statement released by the National Archives Public and Media Communications."</p> <p>As NARA anticipated in the context of a one-term transition, the complex process of completing the transfer of nearly 500 terabytes of Trump electronic Presidential records into NARA's physical custody is still ongoing. Even though the physical transfer of these records continues, NARA assumed legal custody of them on January 20, 2021, in accordance with the Presidential Records Act. It will take a considerable amount of time for NARA to process these electronic records and the other Presidential records from the Trump Administration that we have already received.</p> <p>We hope this is helpful. <p>CBS News</p>	<p>Arden Farhi farhia@cbsnews.com</p>	<p>I wanted to inquire if there are any prohibitions on releasing White House photos or video from January 6, 2021. <p>Government Executive</p>	<p>Courtney Bubl�, cbuble@govexec.com</p>	<p>Would you be able to give me a status update on your records collection from the Trump White House? Last I reported (in early Feb.) the process was still underway. This is for a story that will run this afternoon, probably around 2:30pm.</p> <p>NARA RESPONSE on 3/15/21: Here is the update: We have completed the move of all textual and audiovisual records on media as well as gifts. The process of transferring electronic records is ongoing.</p>
<p>Bloomberg News</p>	<p>Mark Niquette mniquette@bloomberg.net</p>	<p>I'm researching a story about the potential for a Trump Presidential Library and wondered whether there has been any contact between NARA and the former president or his representatives about creating a non-profit organization to begin raising money for a library or any discussions yet about coordinating with NARA on the establishment of a presidential library.</p> <p>NARA RESPONSE on 3/16/21: The records of the Trump Administration (textual, electronic, audiovisual, and artifacts) are currently at National Archives facilities in the National Capital Region and will be administered by the National Archives as a Presidential Library. Questions regarding President Trump's plans for a Presidential Center or Museum should be directed to the Office of Donald J. Trump.</p> <p>BLOOMBERG FOLLOW UP: I received the response, but it didn't answer my question: Has NARA has any discussions with former President Trump or his representatives about a presidential library?</p> <p>John Valceanu response on 3/17/2: Mr. Niquette,</p> <p>As we noted in our previous message, the records of the Trump Administration (textual, electronic, audiovisual, and artifacts) are currently at National Archives facilities in the National Capital Region and will be administered by the National Archives as a Presidential Library. Decisions about building Presidential Museums, Centers and other such facilities are made by the former presidents and their representatives. As we've done with previous administrations, we have provided information to</p>

		<p>representatives of former President Trump to assist them with their decision-making processes. Questions regarding President Trump's plans for a Presidential Center or Museum should be directed to the Office of Donald J. Trump.</p> <p>BLOOMBERG FOLLOW UP 3/17/21: Can you provide the latest NARA fiscal year appropriation and cost for operating presidential libraries, and the latest breakdown of actual costs per library?</p> <p>Also, I've read that all of the currently operating presidential library foundations are structured as 501(c)3 nonprofits. Is that accurate, and are there any legal requirements for the entity used to raise private funds for a presidential library, center or museum -- or do presidents have flexibility for what type of legal entity they use to solicit donations?</p>
Mother Jones	David Corn Washington bureau chief dacor@aol.com	<p>I am writing about a document request recently sent to NARA by the Senate Committee on Homeland Security and Governmental Affairs. Here's a copy of it:</p> <p>https://www.hsgac.senate.gov/imo/media/doc/210309_PetersPortmanLetter_NARA_COVIDdocRequest.pdf</p> <p>Has NARA yet responded to this request? If so, what materials did it provide? If not, is there a timeline or schedule for a response.</p>
Politico	Quint Forgey <qforgey@politico.com>	<p>Follow up from Politico on 4/6/21/approved by Jay B. on 4/7</p> <p>NARA RESPONSE on 4/7/21:</p>

		<p>Q1: Is it still a possibility that the @realDonaldTrump archive will take the form of an archived Twitter account maintained by NARA — similar to the other archived personal accounts of former Trump administration officials? In other words, could the @realDonaldTrump archive still possibly be viewable or available on Twitter, or has that possibility been ruled out?</p> <p>Twitter is solely responsible for the decision of what content is available on their platform. NARA works closely with Twitter and other social media platforms to maintain archived social accounts from each presidential administration, but ultimately the platform owners can decline to host these accounts. NARA preserves platform independent copies of social media records and is working to make that content available to the public.</p> <p>Q2: Will NARA's @realDonaldTrump archive include the tweets from that account that were blocked by Twitter – such as those @realDonaldTrump tweets Twitter blocked from public view on Jan. 6?</p> <p>NARA intends to provide public access to all captured and preserved Presidential Record social media, including any blocked or deleted Tweets that have been transferred to us.</p> <p>Q3: James told me in an earlier email that “since @realDonaldTrump is no longer available on Twitter, we are still working to make the exported content available on trumplibrary.gov as a download.” Does this mean NARA has the exported content? When I asked which @realDonaldTrump tweets had been transferred, I was told NARA “is still receiving electronic records created by the Trump Administration, so we cannot answer this question at this time.”</p> <p>The statement above is still accurate. We continue to receive electronic records created by the Trump Administration, and we cannot provide any more details at this time.</p>
