Washington, D.C. 20024

**Re: Judicial Watch v. DHS  
23-cv-03560 (2023-HQLI-00014)  
Second Interim Response (October 2023)**

Dear Ms. Blankenberg:

This is the second interim response to the October 5, 2022, Freedom of Information Act (FOIA) request to the Department of Homeland Security (DHS) (2023-NPFO-00006).

For this production, DHS reviewed three hundred sixty-six (366) pages of which thirty-three (33) pages were duplicative, two hundred seventy (270) pages were deemed non-responsive, and sixty-three (63) pages were disclosed in part pursuant to FOIA exemption (b)(6).

The sixty-three (63) pages provided are numbered DHS-001-03560-000045 to DHS-001-03560-000107.

If you have any questions regarding this release, please contact Assistant United States Attorney, Stephen DeGenaro at [Stephen.DeGenaro@usdoj.gov](mailto:Stephen.DeGenaro@usdoj.gov).

Sincerely,

A handwritten signature in cursive script that reads "Eric A. Neuschafer".

Eric A. Neuschafer  
Senior Director  
FOIA Litigation, Appeals, Policy and Training

Enclosure: 63 pages

(b)(6) commented:

I reported this issue to the head of engineering at Citizen with the email, which included (b)(6) email as well as the incorrect screen shots. I will update the ticket when I hear back.

Hi, (b)(6)

Our team at the Election Integrity Partnership received a report from the Pima County Recorder that a variety of datapoints about voting in Arizona are wrong. I've included the ticket contents from the official below as well as the screenshots with the incorrect information.

I'm not sure what your data source was for you election center, but you might want to do a more aggressive sweep for incorrect data or perhaps disable the feature until you can verify that what you are showing is correct. The number of errors on this one screen is not a good sign.

Our Partnership is working directly with Google, Twitter, Facebook, TikTok, Pinterest, Reddit and other platforms to route reports of election disinformation their way. If you think that there might be more issues, perhaps we can onboard your folks to get alerts when we receive reports from the 8,000 local election officials we are plugged into.

Let me know if you need any more information to fix this. Please let me know when it is handled so I can update the Arizona authorities.

Thank you,

(b)(6)

**Subject:** CISA <> Stanford Internet Observatory, Election Misinformation Project Introduction

Good Afternoon All,

Thank you very much for taking the time to meet this morning. Overall, I think we got good buy-in from both SIO and CISA on the proposal and its potential to improve the impact of both organizations this upcoming November. I have attached notes which (b)(6) graciously took during the meeting, as well as some action items below.

July will be big to get things going on both the CISA and SIO front, so we will be sure to keep open lines of communication. Thank you again for everyone's help in getting this going, looking forward to getting to work here!

Respectfully,

(b)(6)

**Action Items**

CISA (@ who I will be reaching out to)

- EI-ISAC connection: introduction to (b)(6) heading social media reporting (@Masterson, Matthew)
- CFI plug-in: discussions how to best integrate reporting into CISA/CFI's ops center and send tips back to SIO (@Scully, Brian)
- Legal: get an initial proposal for OCC (@Snell, Allison)

SIO

- Finalize operational details
  - Full deliverables calendar to be created and shared
  - Define workflow management system which will be the surface presented to Legal
- General development will now ramp up
  - Toolset + OSINT training (to invite CISA)
  - Partnership building within research community
- Publicly announcing the partnership in 2-3 weeks (webinar)

(b)(6) commented:

Hello CIS Partners: given that there is a caveat on the top right hand side that says 'as of 9/17', and the caveat at the bottom that says some states might allow later registration, and since the deadlines are changing to a later date, the EIP does not view this as misinformation and it would not violate platform policies. Our DNC partners are shared onto this ticket so they are aware of potential confusion.

(b)(6) commented:

As per (b)(6) comment, we verified all these are the mail registration deadlines. The caveat at the bottom makes this slightly more clear, it could have been less confusing. To our DNC partners now on this thread, adding you for visibility that this image (which was also shared by Obama in a tweet) was slightly confusing to our NASED partners. A graphic with more clear signposting on this might be recommended for clarity, but we found **no mis or disinformation in the image.**

(b)(6) changed the status to Awaiting Response.

Good Evening (b)(6)

Hoping this message finds you well. As a follow up to our conversations a couple of months back, I wanted to highlight a recent post by the Election Integrity Partnership, which was created in response to a message you sent to the CIS misinformation reporting portal. As CIS and CISA have mentioned, we are working with CIS to provide rapid response capabilities to election officials who report to [misinformation@cisecurity.com](mailto:misinformation@cisecurity.com).

Our writeup, [which can be found here](#), summarizes our findings and the actions which we took. Our researchers (CC'd) found this website purports to be a project associated with Kentuckians for Real Options, an unauthorized campaign committee that is registered with the Kentucky Registry of Election Finance. Overall this site seems to exist as a project of the Charles Booker supporters running Kentuckians for Real Options. It appears that they are attempting to prove that his loss was not legitimate by collecting examples of ballot irregularities. All of this information, as well as the actions which platforms have taken, can be found in the above linked report. You can also find our Tweet thread, [here](#).

Thank you very much for sending this case over. We hope to continue to provide useful content to our election official partners, so if there is any further analysis that would be helpful, please let us know. We are working to make our analysis as actionable as possible.

Best,

(b)(6)

*The Election Integrity Partnership is a non-partisan coalition of research entities focused on supporting real-time information exchange between the research community, election officials, government agencies, civil society organizations, and social media platforms. Our objective is to detect and mitigate the impact of attempts to prevent or deter people from voting or to delegitimize election results.*

Hello: (b)(6)

Yes – preference for this Stanford one as I am loading off my CISA work as we ramp up EIP! And absolutely – what flow would that be? The one to go after counter narratives that we discussed today? Adding: (b)(6) here to make sure we can get on the same page on this, he is helping me out with the CIS <> EIP todos today.

Best,

(b)(6)

CIS Misinformation Reporting commented:

We updated (b)(6) KY Assistant Secretary of State, with the following:

"The misinformation has spread across platforms starting a few days ago. As of 10/13 the spread of the content has slowed. Overall the content was picked up by accounts on the left and right in what seemed to be well intentioned warnings to make sure their supporters had their votes counted. A few suspicious accounts picked up the narrative but they also appeared primarily concerned with warning their followers about the possibility, not using it to advance a larger voter fraud narrative. The false information was referred to Twitter and Facebook for removal."

CIS Misinformation Reporting commented:

We notified both sets of election officials, from Kentucky and Colorado, who reported the misinformation, that the EIP communicated an update on Twitter. We closed the case as well.

Hi,

Just circling back here. This content was already investigated and closed out with the MD Board of Elections, when they flagged this to our team through the appropriate channels.

Thanks!
