# Who to engage? [\(link\)](#)

REL000008097.0002

## Example Flow 5 : *Sourced from Platform*

Days after 11/03, Facebook notifies EMP of an impending takedown of a group of pages exhibiting coordinated inauthentic behavior. Since the election, these pages have consistently pushed a narrative encouraging Americans in key states to call for invalidation of election results. Facebook will take these pages down in one hour, and is already briefing relevant state and local election officials.

Input Information			Output Actions		
Source	Subject Matter		Who to engage?	Engagement Level?	Public engagement?
Platform	<i>Subject Matter Priority?</i>	<b>HIGH</b>	Election Officials	LOW, given platform involvement. Higher if requested.	None, pending follow-up analysis, potential collaboration with platform
	<i>Impressions?</i>	MEDIUM			
	<i>Virality?</i>	MEDIUM			
	<i>Coordinated/Inauthentic?</i>	YES			

**Notes:** Given that information is platform-verified, and Facebook has a direct relationship with local election officials, EMP's involvement can be smaller with the initial dump. EMP should follow up with election officials and the platform in case either stakeholder wants for further research.
