Team,

Greetings – I hope this message finds you well. The recent dog bites have challenged us to adjust our operational tactics when Commander is present – please give lots of room (staying a terrain feature away if possible). We will continue to keep (b) (6), (b) (7)(C) in our sight but must be creative to ensure our own personal safety. The senior leaders of the detail and agency continue to address the issue at higher levels with staff and First Family – working to have a better solution soon. Thank you for your patience and understanding.

I know it's been busy and the travel has been insane, so thank you for your sacrifice and dedication to our mission. Please share my heartfelt appreciation with your family as well. I've been very impressed with the work product our team has been producing but most of all the willingness to help each other through various challenges. PPD (FLD) is not easy but I love it because it's a direct reflection of the acronym T.E.A.M - Together Everyone Accomplishes More. I appreciate each of you and your positive attitude, I recognize the important role you play moving us forward.

If you are lucky enough to be off for the 4th – enjoy; if not thank you for working the holiday in furtherance of our mission. Either way, please complete your Web T&A tomorrow (Friday) if possible to assist the admin team in processing our timecards prior to the holiday - so we all get paid. Hope to see you soon as I finish my midnight rotation at the WH.

Till then Stay safe and healthy... Thx again.
